CENSUS OF SCOTLAND—1871.

TABLES

OF THE

NUMBER OF THE POPULATION,

OF THE

FAMILIES, OF CHILDREN RECEIVING EDUCATION, OF HOUSES, AND ROOMS WITH WINDOWS,

IN

SCOTLAND AND ITS ISLANDS,

ON 3D APRIL 1871.

108643

Presented by Command of Her Majesty to both Houses of Parliament.

EDINBURGH: PRINTED BY MURRAY AND GIBB,
FOR HER MAJESTY'S STATIONERY OFFICE.

1871.

[C.—380] [Price 2d., under 2 oz.]

INTERIM REPORT

TO THE

RIGHT HONOURABLE H. AUSTIN BRUCE, M.P.,

HER MAJESTY'S PRINCIPAL SECRETARY OF STATE FOR THE HOME DEPARTMENT.

CENSUS OFFICE,

EDINBURGH, 14*th June* 1871.

SIR,

THE Census Act, 33 and 34 Vict. cap. 108, directed that the Householders' and other Schedules were to be left at every house on or before Saturday, the first day of April 1871, and that the inhabitants were to enter on these Schedules the particulars of the name, sex, age, rank, profession or occupation, condition, relation to the head of the family, and birthplace of every living person who abode in every house on the night of Sunday, the second day of April, and also whether any were blind, or deaf and dumb, or imbecile, or lunatic, and also whether any, or how many of such persons, being of the age of from five to thirteen years, were in regular attendance at school, or were in the receipt of education at home under tutors or governesses.

The Enumerators collected these Schedules, so filled up, on Monday, the 3d April, and copied all the particulars into the Enumeration Books, which, with the Schedules and other documents, were handed to the Local Registrars, who, after revising the work, prepared Summaries of each District. These Summaries, together with all the Enumeration and Memorandum Books, were sent to the Sheriffs of Counties, and to the Chief Magistrates of Royal and Parliamentary Burghs, on or before the 3d day of May, who were to transmit the same to the Registrar-General in Edinburgh not later than the 15th day of May. The Householders' Schedules, on the other hand, were transmitted direct by the Registrars to the Registrar-General, without passing through the hands of the Sheriffs or Chief Magistrates.

From the Summaries prepared by the Registrars the following Tables have been chiefly compiled, giving the numbers on the authority of the Local Registrars, but adding the population of the Shipping in the respective Ports, or in British waters. The numbers, though given on the authority of the Local Registrars, and previous to that careful revisal which is now in progress at the Census Office, may be considered sufficiently accurate for all useful purposes.

The ages of the Children receiving education differ from those referred to in the Census of 1861. At the Census of 1861, it was directed that the number of all Children being of the age of from five to fifteen years who attended school should be given; but the result was unsatisfactory, and did not seem to accomplish the end had in view. In 1867, the Scottish Education Commissioners reported that 'any attempt at school legislation must fail, unless legislators take into 'account the period of life which can be spared for educational purposes.'

'From these facts, it appears that in Scotland, education does not begin 'much earlier than six years.'

'It has already been observed that comparatively few children remain at 'school after twelve years of age; and the question arises, whether school attend-'ance can be prolonged beyond that period.'

'It may be assumed, therefore, that a large majority of the scholars attend 'school for some time between the ages of six and twelve.'

To carry out these recommendations of the Scottish Education Commissioners, the Census Act of 1871 limited the inquiry into the number of Children in the receipt of education to those whose ages were 'from five to thirteen years.' Seeing that the directions as to ages in the Householders' Schedules were to the effect

that the ages were to be stated as at last birthday, the return of Children receiving education would include those who, having completed their fifth year, were entered on the Schedules as five years of age last birthday, up to those who were entered as twelve years of age last birthday, but had not completed their thirteenth year of life.

The whole Returns being taken up under the superintendence of the Local Registrars of Births, Deaths, and Marriages, whose districts, in innumerable instances, do not correspond with the Civil Parishes, which again cause even the Civil and Registration Counties by no means to correspond, much correction of the Registrar's Summaries was required before the population of Civil Counties could be eliminated from those of the Registration Counties. In separate Tables, however, are given the respective populations of both Civil and Registration Counties, as these are required for entirely different purposes.

From the Tables it appears that, on the 3d April 1871, the Population of Scotland, including the seamen belonging to the shipping in Scottish Ports or waters, amounted to 3,358,613 persons, of whom 1,601,633 were males, and 1,756,980 females. This, as compared with the Census of 1861, shows an increase of 151,785 males, and 144,534 females, or a total of 296,319 persons in ten years; being a total increase to the extent of 9·67 per cent. in ten years, or a male increase of 10·47 per cent., and a female increase of only 8·96 per cent.

It thus appears that the Population of Scotland has been increasing during the past ten years very nearly in the same ratio as it did from 1831 to 1841, and from 1841 to 1851. It may be remembered that, probably from the greater amount of emigration, and greater slackness in trade, the increase between 1851 and 1861 was only at the low rate of 6 per cent.; so that the diminished emigration, and the increased prosperity of the country between 1861 and 1871, seems sufficiently to explain the greater rate of increase during these years. The Tables appended relating to Emigration will show that, between 1861 and 1871, only 157,838 natives of Scotland emigrated from the ports of the United Kingdom at which there are Emigration Officers; while from 1851 to 1861, with a smaller population, there emigrated 183,620 natives of Scotland.

The Legislature, however, and the public, are both interested in ascertaining among what class of the Population it is that the increase has chiefly taken place. For this purpose, Tables VIII. and IX. have been prepared, dividing the Population of Scotland into Four Groups: 1st, PRINCIPAL TOWNS, with Populations above 26,000; 2d, LARGE TOWNS, with Populations from 10,000 to 26,000; 3d, SMALL TOWNS, with Populations from 3000 to 10,000 persons; and 4th, RURAL DISTRICTS, which comprise the remainder of Scotland, with all the small villages, &c.

By these Tables, it appears that the principal Towns, during the ten years, increased by 183,528 persons, being at the rate of 20·96 per cent.; the Large Towns increased by 56,114 persons, being at the rate of 22·09 per cent.; the Small Towns increased by 37,856 persons, being at the rate of 7·53 per cent.; while the Rural Districts only added 18,821 persons to their population, being at the low rate of 1·32 per cent. of increase. Even in these Rural Districts the increase was almost entirely limited to the villages of from 2000 to 3000 inhabitants; the greater portion of the truly Rural Districts being either stationary in their numbers, or exhibiting a greater or lesser decrease.

TABLE I. Comprises the numbers of the Population, distinguishing the Sexes, of the Families, of the Children from five to thirteen years in the regular receipt of education, of Houses, and of Rooms with one or more windows, in SCOTLAND, in its EIGHT DIVISIONS, and its thirty-three CIVIL COUNTIES, on the 3d April 1871. The numbers include the Military in Barracks and the Seamen on board Vessels in Scottish Harbours or waters on the night of 2d April; but do not include the 4202 persons on board Scottish Vessels in Foreign Ports, and at Sea, whose returns we have already received; nor yet the persons on board Scottish Vessels in English, Irish, or Colonial Ports, of whose numbers we are yet ignorant. The returns from the inaccessible island of St Kilda have not yet been received; but to complete the Tables, the Population of that island has been estimated as it stood in 1861.

TABLE II. Exhibits the same facts for SCOTLAND, grouped in its EIGHT REGISTRATION DIVISIONS, and its 33 REGISTRATION COUNTIES. With the exception of the Insular Counties of Shetland, Orkney, and Bute, the Populations of the Registration Counties differ more or less from those of the Civil Counties.

TABLE III. Is prepared with the view of showing the comparative increase or decrease in the numbers of the Population and Houses in 1861 and 1871, in SCOTLAND and in its several CIVIL COUNTIES.

TABLE IV. Shows the numbers of the Population, distinguishing the Sexes, in each of the CIVIL COUNTIES of SCOTLAND, at the taking of each Census from 1801 to 1871. It has to be noted, however, that the Army at home was first included in the returns for 1841; and that the number of Seamen on board Vessels in Scottish Ports or waters was first included in 1851. The returns for 1871, of course, contain both.

TABLE V. Is framed from Table IV., and shows the increase or decrease of the Population in each of the CIVIL COUNTIES, and in all SCOTLAND, in the intervals between the taking of the several Censuses from 1801 to 1871.

TABLE VI. Is based on the numbers given in Table V., and shows the rates of increase or decrease in the respective Sexes, and in the whole Population of SCOTLAND, in each of its CIVIL COUNTIES, in decennial periods, from 1801 to 1871.

TABLE VII. Gives some particulars relative to the PARLIAMENTARY BURGHS OF SCOTLAND, as to the Population, number of Families, of Children in the regular receipt of Education, of the Houses, and Rooms with Windows. Two Parliamentary Burghs, Galashiels and Hawick, have been added since 1861.

TABLES VIII. and IX. Give a comparative view of the Population of Scotland when thrown into Four Groups according to density of Population, viz., Principal Towns, Large Towns, Small Towns, and Rural Districts, Table VIII. giving the numbers of the Sexes and Persons in each, while Table IX. shows the increase in the Sexes and Persons, and the percentage of increase between the Census periods 1861 and 1871.

TABLE X. Shows the number of Persons on board Scottish Vessels in Foreign Ports, or at Sea; but does not include the much larger quantity of Scottish Shipping in English, Irish, and Colonial Ports and Seas, on the 2d of April 1871.

TABLE XI. Shows the ascertained number of Emigrants from the United Kingdom between the periods at which the two Censuses of 1861 and 1871 were taken, distinguishing the Birthplaces of the Emigrants, so far as ascertained.

TABLE XII. Shows the Emigrants whose Birthplaces who were not ascertained distributed in proportion over the other groups.

We have the honour to be,

. SIR,

Your most obedient Servants,

W. PITT DUNDAS,
Registrar-General.

JAMES STARK, M.D.

SCOTLAND.

TABLE I.—HOUSES AND POPULATION IN THE DIVISIONS AND CIVIL COUNTIES IN 1871,

Together with the Number of Families, the Children from 5 to 13 Years of Age receiving Instruction, and the Number of Rooms with Windows. (Including Shipping).

Divisions and Civil Counties.	Number of separate Families.	HOUSES.			POPULATION.			Children from 5 to 13 Receiving Education.	Number of Rooms with one or more Windows.

CENSUS OF GREAT BRITAIN.
1851.

C.X.k.13

TABLES

OF THE

POPULATION AND HOUSES

IN THE

DIVISIONS, REGISTRATION COUNTIES, AND DISTRICTS OF

ENGLAND AND WALES;

IN THE COUNTIES, CITIES, AND BURGHS OF

SCOTLAND;

AND IN

THE ISLANDS IN THE BRITISH SEAS.

Presented to both Houses of Parliament by Command of Her Majesty.

LONDON:
PRINTED BY GEORGE EDWARD EYRE AND WILLIAM SPOTTISWOODE,
PRINTERS TO THE QUEEN'S MOST EXCELLENT MAJESTY.
FOR HER MAJESTY'S STATIONERY OFFICE.

1852.

THE Census Act, and the Instructions issued in conformity with its provisions, required that the 40,000 enumerators employed should copy into as many Books all the particulars collected by them concerning the inhabitants of Great Britain. These Books were to be placed, complete, in the hands of the 2190 Registrars in England, and the 1074 Superintendents of Parishes and Burghs in Scotland, who were to subject them to a strict examination, and make all necessary corrections. This being accomplished, the Books were to be transferred to the custody of the 624 Superintendent Registrars in England, and the 115 Sheriffs, Sheriffs-Substitute, and Provosts in Scotland, who were required to test the accuracy of their contents by a further process of revision.

The Act of Parliament allowed these officers until the 1st of June, for the purpose of returning the revised Books to the Census Office, where they have still to undergo strict and minute examination and revision, before any detailed and authentic statement of results can be presented to the world. As this essential labour must, however, of necessity, engage much time, it was thought desirable not to withhold from the public such an approximation to the facts as might be obtained, without waiting for the entire completion of this series of checks. The Registrars, therefore, in England, and the Sheriffs and Provosts in Scotland, were desired to frame and to forward to the Census Office, summaries of the population and houses within their respective districts.

From these summaries the following Tables have been compiled, and they must be taken to represent the results of the Census according to the statements of the local officers, previous to the revision now in progress at the central office. And although minute accuracy is not in these Tables to be looked for, neither is it to be apprehended that the alterations which a careful revision of the original documents may render necessary for a future publication will be of importance sufficient to lessen the value of the figures, as materials for whatever general inferences may fairly be drawn from them.

In the present publication, the "Counties of England and Wales," which may be denominated "*Registration Counties*," comprise groups of Registration Districts, generally conterminous with Poor Law Unions; consequently the aggregates of such districts seldom correspond with the precise boundaries of the actual counties. The rule adopted, whenever a district extends into more than one county, has been to assign it wholly to that county in which, at the Census of 1841, the greater portion of the population of that district was located. For the purpose of comparison between the different Censuses, the population of the counties previous to 1841 is given for the same boundaries as those which have since been assigned to the "Registration Counties." As Scotland is still without any system of registration, the counties there remain as before.

The Tables, so far as concerns the return of females, require no explanation; but the return of males is disturbed by the circumstances that a portion of the army, royal navy, and merchant service is out of the country—that the numbers vary largely—and that in the earlier Censuses no attempt was made to distinguish those at home and abroad, or those belonging to Ireland and Great Britain. Reserving these questions for investigation, the following are the facts of most importance to be borne in mind in reasoning on the Tables.

In every Census of Great Britain, from 1801 to 1831, the enumerators were instructed to take an account of the number of persons actually found within the limits of each parish, township, or place "*exclusive of men actually serving in His Majesty's Regular Forces or Militia, and exclusive of seamen, either in His Majesty's service or belonging to registered vessels.*" The army, royal navy, marines, and seamen in registered vessels of the United Kingdom are added to the population in the *General Summary of Great Britain*, with a proper inti-

mation that "many soldiers and sailors are *attributable to Ireland.*" In 1841 the instruction was different; the soldiers and sailors ashore in Great Britain were enumerated at their several barracks or places of residence, and entered under the parishes in which they slept or abode on the night of June 6th: 5016 persons were returned as travelling on railways, and can now be referred to no particular locality.

In 1851 the enumerators were instructed to take an account of the whole of the population, including soldiers and sailors who slept or abode in their districts, on the night of Sunday, March 30th. The persons travelling on railways on that night were returned at the places of arrival, except the few who would not reach their destination at an early hour on Monday the day of enumeration. The royal navy in British Ports was returned; and arrangements were made with the Commissioners of Customs, who employed their officers to enumerate all the persons on board vessels, in each port of the United Kingdom, on the night of the Census. The population in vessels is thus included in the returns of the districts containing the ports and docks, or the districts to which the ports are adjacent. This course has been adopted with a view to a subsequent comparison of the population of each district with the registered Births and Deaths.

Table I. comprises the population enumerated on March 31st, 1851. And an estimate has been made from the official returns, of the number of males in the army, navy, and merchant seamen belonging to Great Britain, but stationed in the East Indies, the colonies, and abroad, when the Census was taken.

In reading Table V. it will be recollected that the army at home (29,846 in England and Wales and 2884 in Scotland) is included in the return for 1841; and that the return of 1851 includes not only the army, but 45,295 persons in England and Wales, and 5363 in Scotland, on board ships in the several ports and docks.

Table VI. is framed in great part from Table V. The three first columns are, for instance, obtained by subtracting the number of persons enumerated in 1801 from the number of persons enumerated in 1811; the numbers enumerated in 1811 from the numbers enumerated in 1821; and the numbers enumerated in 1821 from the numbers enumerated in 1831. The army in the respective counties not having been enumerated in 1831, was deducted from the return of 1841, before taking the difference. The persons on railways (5016) have also been deducted. In obtaining the last column, the numbers returned in 1841, including the military, were subtracted from the numbers returned in 1851, also including the military but exclusive of the royal navy and seamen in ports, amounting in the latter year to 45,295.

In calculating the *rates of increase*, the same considerations are taken into account; and a correction is made for the slight inequality in the intervals between the Censuses. The decennial rate of 1841-1851, derived from the two returns made at an interval of 9·814 *years*, expresses the *rate of increase* in 10 *entire years*. The interval between the Censuses of 1801 and 1851, is taken in the calculation at 50 years. The numbers in the army and the royal navy have varied so much at different Censuses, that the rate of increase derived from the females enumerated, is probably the most correct expression of the increase of the whole population.

The Census of	1801	was taken on	March	10	and on the days immediately subsequent
„	1811	„	May	27	thereto, if *one* day was not sufficient.
„	1821	„	„	28	In 1841 and 1851 the Enumerators were
„	1831	„	„	30	instructed to return only those who slept
„	1841	„	June	7	or abode in their districts on the night
„	1851	„	March	31	preceding the day named.

Annual Rate of Increase per Cent. in Fifty Years	1·37					

The army, royal navy, marines, and registered seamen are not included in this Table prior to 1841, as they were not returned separately for Great Britain; in 1841 and 1851 the soldiers and the sailors ashore are included in the population, but allowance has been made for the disturbance which this occasions in the "increase" and the "rate of increase." In taking the increase from 1831 to 1841, the military

NOTE.—The *Registration Counties* comprise groups of entire Registration Districts, generally conterminous with Poor Law Unions. Whenever a District or Union extends into more than one County, it is assigned to the Registration County in which the greater part of the population of that District was enumerated in 1841.

NOTE.—Where the minus sign (—) is used, it signifies that the numbers, instead of augmenting, have decreased to the extent shown by the figures before which it is placed.

The Table is read thus:—The increase of the population of Leicestershire was 20,405 persons in the interval between the Census of 1801 when the population enumerated was 133,975, and the Census of 1811, when the population enumerated was 154,380. The army, royal navy, and merchant seamen are left out of the account in these Tables of increase. All the intervals are not quite equal.

NOTE.—The Table is read thus:—The population of England and Wales enumerated on March 10th, 1801, and the few following days, was 8,892,536; the population of England and Wales enumerated on March 31st, 1851, exclusive of persons sleeping in vessels, was 17,877,473; the difference, 8,984,937, is here given as the increase. The population of 1801 is exclusive of the army, navy, and merchant seamen; the population of 1851 includes the army in England under the several counties in which the soldiers slept or abode on the night of March 30th. In a subsequent publication the necessary corrections will be discussed, and determined as nearly as they can be from the existing documents, which supply no means of distributing the army, navy, and seamen in 1801, over the counties to which they belong. The increase of population may be most correctly inferred from the returns of females. The increase of males and of persons is, for the reason before given, somewhat overstated.

NOTE.—The Table is read thus:—The increase of females was such in the interval of the Census of 1801 and of 1811, that to 100 females living in the middle of 1801 the addition was 14 in 10 years; every 100 increased to 114. The increase is at the rate of 14 per cent. in the 10 years 1891—1811; 16 per cent. in the 10 years 1811–21; 16 per cent. in the 10 years 1821–31; 14 per cent. in the 10 years 1831–41; and 13 per cent. in the 10 years 1841–51. The increase of persons and of males is somewhat disturbed by the fluctuations in the numbers of the army, royal navy, and seamen.

Wherever the minus sign (—) is prefixed in this Table it denotes that instead of increasing the population has decreased at the rate per cent. expressed by the figures before which it is placed.

Sta. denotes that the population was nearly stationary.

1846	43,439	82,239	2,347	1,826	129,851
1847	109,680	142,154	4,949	1,487	258,270
1848	31,065	188,233	23,904	4,887	248,089
1849	41,367	219,450	32,191	6,490	299,498
1850	32,961	223,078	16,037	8,773	280,849
1851 To March 31	—	—	—	—	56,584
Total . .	. .	. .	. .	. .	2,622,617

The Return does not distinguish the Emigrants born in Great Britain from those born in Ireland.

From this Return it may be inferred that the Emigration from the United Kingdom was not less than . . 717,913 in the interval of the Censuses, 1831 and 1841 ; and
1,692,063 in the interval of the Censuses, 1841 and 1851.

GEORGE GRAHAM,
Registrar-General.

Census Office,
21*st June* 1851.

INDEX.

NOTE.—In this alphabetical arrangement the principle is adopted of placing the Districts and Burghs having compound names, in the order indicated by the usual pronunciation of those names: thus, East Stonehouse will be found under the letter E., St. George Hanover Square under the letter S. The Counties and Burghs of Scotland are printed in *italics*.

CENSUS OF 1871.

PRELIMINARY REPORT

TO

THE RIGHT HONOURABLE HENRY AUSTIN BRUCE, M.P.,

HER MAJESTY'S PRINCIPAL SECRETARY OF STATE FOR THE HOME DEPARTMENT.

SIR, Census Office, London, 20th June, 1871.

BEFORE referring to the results of the Census, it is proposed here to describe briefly the arrangements which have been made under your sanction to ensure as much accuracy as is attainable in enumerating in one day by name every person living in these Islands.

The Census of Ireland was intrusted to a Royal Commission, the Census of Scotland to the Registrar General of Scotland, through whose friendly co-operation the population of the United Kingdom will be tabulated, as regards essential particulars, on a uniform plan.

The Census of England and Wales was taken pursuant to the provisions of the Act 33 & 34 Vict. c. 107., which rendered available the staff of officers who carry out the registration of Births and Deaths in their several districts. The same machinery had been employed in the three previous enumerations, and many of the officers had therefore had experience which they turned to good account. In the towns they knew every court and street, in the country every cottage and hamlet. The Metropolitan, the Municipal, and the County Police afforded help in enumerating the homeless population. The strength of the Navy, in forms prepared for the purpose, will be returned by the Admiralty; the Merchant Seamen, in port or out at sea, by Her Majesty's Customs and by the Registrar General of Merchant Seamen; and His Royal Highness the Field Marshal Commanding-in-Chief will supply full returns of the various required particulars respecting the Army. British subjects in Foreign States, and in India, and the population of the Colonies, will be inquired after by Her Majesty's Secretaries of State for Foreign Affairs, India, and the Colonies.

The population in the Islands of the British Seas has been enumerated under the supervision of the respective Governors.

This preliminary publication refers to the population at home on the Census day.

The population of England evidently could not be enumerated in one day by the 2197 Registrars; and it was ascertained that this could only be successfully accomplished by dividing the kingdom in 1871 into 32,606 districts, to each of which a special Enumerator was appointed. To muster, instruct, supply with materials, and to pay this army of volunteers after their work had been checked, was one of the most difficult parts of the work. Their qualifications were thus defined in the instructions approved by you:—

"Every person proposed for appointment as an Enumerator must be intelligent, "trustworthy, and active; he must *write well*, and have some knowledge of arithmetic; "he must not be infirm, nor of such weak health as to render him unable to undergo "the requisite exertion; he should not be younger than 18 years of age nor older than "65; he must be temperate, orderly, and respectable, and be such a person as is likely "to conduct himself with strict propriety and civility in the discharge of his duties. "He must make himself well acquainted with the district and the local boundaries "within which he will be required to act; and it will be a further recommendation if "his occupation has been such as to add to his fitness for the office. He must himself "be prepared to undertake the delivery of the Householders' Schedules in the week "commencing 27th March, as well as their collection on the day of the Census, the "3rd of April. Any clergyman or other minister of religion, or any professional man "who takes a special interest in the people of the place, might be invited to act as an "Enumerator."

The Enumerator in 1861 was paid a fixed fee of 1*l.*; and at the rate of 2*s.* for every 100 persons enumerated by him over the first four hundred; in large districts a mileage was allowed. After careful consideration of the tariff and of its effects on the estimates, the Registrar General submitted, with your approval, to the Lords Commissioners of Her Majesty's Treasury, that it would be right, with a view to efficiency of service, to raise the fixed fee from a pound to a guinea, and the rateable payment

from 2*s.* to 2*s.* 6*d.* a hundred; that is, 5 and 25 per cent. respectively on the two items; the mileage remaining the same. Under these rates the Enumerators undertook by agreement to discharge their various duties; and for their services in delivering the schedules, collecting, revising them, and copying their contents into books, received 53,919*l.* 15*s.* 6*d.* The whole of the 35,430 local officers* employed have been paid 78,299*l.*

No one, taking into account the required qualifications, and the quantity of work to be done, will consider that they were overpaid; or be surprised to learn that a certain number of the Enumerators, perhaps justly, considered that they were under-paid. Under a fixed tariff of pay this result is inevitable. The district assigned to each Enumerator varied in size, according as the population was dense or scattered; and this was partly taken into account by giving, in addition to a fixed fee, rated additional payments by numbers and by miles travelled. But it is evident that the Enumerator's labour might be considerably increased in certain streets where the schedules were not filled up; he might incur, not only trouble, but, as some of them pointed out, danger, by going into courts where small-pox and other diseases were epidemic. These elements could not be taken into account in a general tariff; nor could elements of greater importance, namely the very variable demand and supply, or the usual pay of such skilled officers as were required in different parts of the kingdom. What pay would be ample in one town would be insufficient in another. Yet it would have been inexpedient to leave it open to the Registrars to make a separate bargain with each Enumerator; for if different scales had been applied to London, the great towns, and the country, general instead of partial dissatisfaction would have been the inevitable result.

The Enumerators, notwithstanding these small difficulties, have done their country good service; they have all sent in their books in time, and have thus enabled the Registrars to supply the summaries of the facts which are embodied in the present publication; and there is every reason to believe that the books which have yet to be examined will be found, as on previous occasions, creditable to them as a body, and in many instances deserving of the highest praise.†

The Census is taken with comparative ease in a town where all the streets and the courts are named, where all houses are consecutively numbered, and where all the boundaries are distinctly marked. Such business-like arrangements are always made where the municipal government is intelligent and energetic; but the duty is unfortunately neglected in many places, and the residence of ratepayer, voter, or householder is identified with the greatest difficulty. To facilitate the enumeration, a circular was addressed to the Mayors of the several boroughs, and to the Chairmen of all the Local Boards in the kingdom, pointing out the requirements of the law, and soliciting their assistance, and the assistance of their officers, as well in preparing the way for the Census as in completing it. We take this opportunity of thanking the municipal authorities for their zealous co-operation. The clergy and ministers of religion were also helpful; the press afforded very efficient aid in various ways; the people took pains to fill up the schedules carefully, and where any had accidentally been overlooked by an Enumerator, they often applied to the Registrar or to the Census Office.

It is, we believe, impossible, with all these advantages, to enumerate every individual in dense towns, so that the population is always somewhat understated; but there is reason to believe that the numbers that escape are few, and, in consequence of the many improved arrangements, mechanical or administrative, suggested by experience, and now brought into action, the Census of the Kingdom has never been more accurately taken. The errors in the revised figures are not likely to be of any magnitude.

---

* Of these local officers there were 627 Superintendent Registrars, 2,197 Registrars, and 32,606 Enumerators (including 627 for public institutions and 66 for boats and barges).

† *Note.*—The following are a few specimens of the curious incidents to which the Census gave rise:—

14 schedules were sent to the Registrar General privately to avoid scrutiny of Enumerators in country districts, his sanction having been previously obtained.

A spinster in the country, of rather advanced age, very wealthy, fastened up her doors and windows, forbidding access to the Enumerator, and saying a fine of 20*l.* would not induce her to give him the required particulars. In answer to a soothing letter, she sent the Registrar General her schedule privately.

A gentleman of landed property declared he would pay a fine of any amount, indeed would rather cease to exist, than commit the offence for which David suffered, as recorded in the Old Testament. His religious scruples were respected, and the particulars of his family were nevertheless recorded with tolerable accuracy.

One Enumerator states that he was insulted and assaulted, so much so that he summoned the householder before the Magistrates, who inflicted a fine.

No prosecution was instituted by the Registrar General; but a few recusant householders appear to have been proceeded against in the country, and fined at the instance of Enumerators.

The following paragraph is from a local paper:—

"*Objecting to the Census.*—A middle-aged man has been fined 1*l.* and costs by the Devon county magistrates for refusing to make out a Census paper for himself and his child. He declared that he knew neither his own name nor his place of birth, and he would not perjure himself by making a false entry. At St. Austell, a gentleman, the possessor of considerable property, has refused to allow the Census Schedule to be taken into his household. He will be summoned."

A lady in a London district, appointed Enumerator, discharged the duties very efficiently.

An "Author" in last column states, "wife says" that he is "both idiot and lunatic."

The 32,606 Enumerators had districts of less than two square miles in area, containing 131 houses, and 696 people on an average; but the size, and the numbers of the people, in these districts varied greatly. A wide moor, with 64 people and a few scattered cottages, was a district populous enough for one man; while in London one Enumerator counted 3,599 souls, another 3,860, and a third 4,800. Enumerators, it must be added, were allowed to appoint authorized assistants in certain cases.

NUMBER of ACRES, INHABITED HOUSES, and POPULATION in ENGLAND and WALES to an AVERAGE REGISTRATION DISTRICT, REGISTRATION SUB-DISTRICT, and ENUMERATION DISTRICT.

——	Acres.	Inhabited Houses.	Population.
ENGLAND AND WALES - - -	**37,324,883**	**4,259,032**	**22,704,108**
To 1 Average District - - -	59,529	6,793	36,211
To 1 Average Sub-District - - -	16,989	1,939	10,334
To 1 Average Enumerator's District - -	1,145	131	696

The best time for taking the Census many statists have agreed is the first day of each year, and in the abstract they are right. But in England the climate has to be consulted. Some parts of the country are almost inaccessible in the dead of winter, and the work of the Census day would be cut up by short hours. The nomadic part of the population, it is true, is at home in January, but even in early spring few of the vagrants so numerous in summer are in the roads, streets, and fields. The midnight of Palm Sunday was fixed on as the Census hour; and on the 3rd of April, the month when the English folk of old longed to go on pilgrimages, the 32,606 Enumerators began their work, and wended to "every shire's end of England." The day, and this was not unimportant, was cool and fine all over the kingdom. The Enumerators collected 5,030,895 schedules from that number of families or lodgers living in 4,259,032 houses.

The enumerated population of England and Wales living at midnight on April 2nd 1871 was 22,704,108 souls.

This is an increase of 2,637,884 over the numbers living at the last Census, and exceeds our expectations.

For the increase from 1851 to 1861 was 2,138,615, and the rate of increase was 12 per cent. in the ten years that ended in 1861; whereas the rate of increase in the last ten years has been 13 per cent.

To the above numbers the Army, Navy, and Merchant Seamen Abroad have to be added when the numbers and proportions appertaining to England and Wales are known. Foreigners, now numerous in England, are a set-off against the numbers of Englishmen of other classes abroad.

The population increased rapidly from 1801 to 1811 while the French war was going on, and most rapidly after the peace; the increase from 1811 to 1821 was 18 per cent., and from 1821 to 1861, while emigration grew every year more extensive, the population went on increasing, but at a decreasing rate, so that in the decenniad ending in 1861 the increase became 12 per cent.; the actual addition to the numbers was every ten years (except in 1841–51) greater than in the ten years preceding, but it was never so great before as in the ten years which we have just passed through.

The population of England and Wales at home in 1801, when the first Census was taken was 8,892,536; and the mere increase of Englishmen since the year 1831 is very nearly equal to the whole of those existing in the year 1801, when the country was engaged in the great conflict with France, and with the armed sovereigns of the north of Europe.

The causes of the more rapid increase in the last ten years of the number of the inhabitants of England and Wales are complex, and can be more satisfactorily discussed after all the facts have been analysed.

Here we have only to pass the people rapidly in review as they are distributed over the kingdom, and take a note of the counties which have been left by their children, and the cities to which the emigrants have resorted to fill up the ranks of our industrial armies.

I. DIVISIONS OF THE COUNTRY.

England is divided into 40, Wales into 12 counties; and these counties have from early historical times been subdivided again into hundreds, tythings, townships, parishes, and other subordinate territorial units. This has not been done on any settled uniform plan. The English county boundary even now divides many parishes, each divided parish being, therefore, in two counties; and detached parts of parishes are dispersed in the midst of other parishes. The recent great division of the country into unions was made again with no regard to the hundred, and little regard to the county boundaries; the borough boundaries were also set at nought; convenience, in fact, in administering the new Poor Law was alone considered by the Commissioners. The Districts under the Registration Act are generally coterminous with the Poor Law Unions; the clerk to the Board of Guardians being usually the Superintendent Registrar; and the Registrars are appointed by the Boards of Guardians. It was by means of these officers that the Census was taken; and consequently the numbers in this first publication, derived from their summaries, are necessarily given in the same districts and sub-districts as the births, deaths, and marriages are registered.

At the same time, the necessary details have been obtained to show the populations not only of the counties, but of the several boroughs, municipal and parliamentary. The population, subject to future revision, is also given of the Parliamentary Divisions, under their respective counties, alphabetically arranged.

II. THE ELEVEN REGISTRATION DIVISIONS.

For the convenient exposition of the facts relating to population, and the determination of the relation of these facts to others in equally large masses, England was divided at the Census of 1851 into Ten great Divisions; Wales constituting one Division by itself. Those Divisions, maintained in 1861 and found for many statistical and some physical purposes convenient, are maintained now: they are constituted by *groups of districts*, wholly or chiefly, but not entirely, in the counties under which they are subordinately arranged. If the counties consisted of entire districts, the divisions would consist of entire counties, but that, as has been already observed, is not the case; so the population of the divisions will not be obtained by casting up the population of the under-mentioned counties.

In noticing the distribution of the population over each of the eleven divisions, a few of the leading facts on which its character, existence, and development depends will be briefly described.

The subjoined Tables show the increase and the density of the population in the Eleven Divisions:—

POPULATION and INCREASE in Eleven REGISTRATION DIVISIONS, 1861–**1871.**

———	Area in Acres.	Enumerated Population April 8, 1861.	Enumerated Population April 3, **1871.**	Increase 1861–71.	Decennial Increase per cent. 1861–71.	Annual Increase per cent. 1861–71.
ENGLAND AND WALES -	37,324,883	20,066,224	22,704,108	2,637,884	13·15	1·24
Division I. London - -	77,997	2,803,989	3,251,804	447,815	15·97	1·49

„ XI. Welsh - - - -	3·60	·28	178	69	1·46

An English Division contains on an average 2,148,769 inhabitants, living in 351,343 houses, on 3,259,040 acres of land. It contains about 300,000 men of the ages 20–40, one tenth of whom would form a corps of 30,000 effective men. The area is 5,092 square miles, equal to a square of 71 miles to the side. It is of rather less size than Yorkshire, and somewhat less populous. Besides size and population in forming the Divisions out of districts or counties, contiguity and industrial connexion were considered. The North-Western Division contains the greatest number (3,382,590), the Eastern Division the least number (1,218,257) of people; thus no division contains less than a million, nor more than four millions of people; not more therefore than double nor less than half the population of the average division. The numerical ratios deduced from these large numbers are not liable to the extreme fluctuations deranging accidentally the results where small numbers are used. The largest, South-Western Division, has an area of 7,804 square miles; the North-Western, the most populous, is the smallest, except London, and has an area of 3,125 square miles. The area is less, but the population of these divisions is on a par with the population of such states as Denmark and the Netherlands; of Saxony and Wurtemburg in Germany; Piedmont and Tuscany in Italy. The eleven provinces of Prussia have the same average population, but they are more than twice as extensive as the English divisions, which correspond in size with the average area of the ancient provinces of France at the Revolution, cut up into 83 departments by the Constituent Assembly.* In England the Kingdoms of the Heptarchy had given place to counties corresponding to the French Departments long before the Conquest, and are not recognised in the Doomsday survey, but the idea of territorial units greater than counties existed. The Roman provinces of Great Britain were larger than the kingdoms of the Heptarchy.

Ireland is now conveniently divided into four provinces, which, with ten divisions of England, one Welsh, and two for Scotland, will constitute seventeen divisions of corresponding magnitude. The English divisions may, at some future time, receive, like those of Ireland, simpler and shorter names than we have ventured to employ.

1. LONDON.

London deserves the first place, as it is the living centre of the Empire, where all its forces converge. It grows as the power of England grows; it is the emporium of capital; and its people are in communication by birth and blood, by trade and intelligence, with all the affiliated cities in these Islands. The railways have not only put the population of the kingdom in free communication with the Metropolis, but have enabled large numbers of men of all ranks to settle around its borders. The central parts are converted into markets, exchanges, warehouses, stations, offices which are thronged during the day, but are deserted during the night by their occupants. A

* On s'étonne de la facilité surprenante avec laquelle l'Assemblée constituante a pu détruire d'un seul coup toutes les anciennes provinces de la France, dont plusieurs étaient plus anciennes que la Monarchie, et diviser méthodiquement le royaume en quatre-vingt-trois parties distinctes, comme s'il s'était agi du sol vierge du nouveau monde.—"*L'Ancien Régime et la Révolution*," *par A. de Tocqueville*, p. 135. He quotes the well-known passages in Burke's Reflections.

double force of displacement is at work; men are driven from Westminster and London by the high rents of the central houses, and are attracted outside by the charms of the surrounding country, with which the railways put them in easy communication.

Thus it comes that the ancient venerable city of London, under the sceptre of the Lord Mayor, associated with the liberties, the rights, the history, and the power of England, had "within and without the walls" on the Census night only 74,732 people; down to which number it had dwindled since 1861, when the numbers enumerated were 112,063. The decrease in ten years is 37,331, or nearly one out of three of the original number. Its streets empty and almost silent during the night, present a very different aspect during the day, and the Corporation of the city deemed it right in order to determine the numbers, to take a Day-Census in 1866, with the following results: they found that, in addition to the ordinary sleeping population, the mercantile men engaged in the city daily amounted to 170,133. The numbers have probably increased since that date, for the city was never before so full as it is now in the daytime.

A similar movement occurs in Westminster and in some of the other central quarters of London.

The boundaries of a city are easily fixed when the population is stationary; if it is a fortress, they are defined by the walls. But the cities of "England bound in with the triumphant sea" on which her invincible navy rides, have for centuries been without walls, and have freely extended along the roads and over the fields; London is their head and type. In the early ages the City covered rather more than a square mile of ground: and there it stood still in the middle ages, enthroned on its chartered privileges, jealously refusing to admit aliens to the privileges of its citizens; but the people of England, though spurned by the city, settled round their capital, which, unlike Rome, was ever viewed almost with indifference alike by senate and sovereign; who paid, indeed, no further regard to its sanitary deficiencies than to take warning when to fly away, from its weekly Bills of Mortality, which in 1604 were extended to St. Giles in the Fields, Clerkenwell, Shoreditch, Whitechapel, the great St. Martin in the Fields, (from which neither St. James Westminster, nor St. George's Hanover Square, had then been divided,) and to Bermondsey: St. Margaret Westminster, was included in 1626; so in 1636 were Hackney, Islington, Stepney, Lambeth, Newington (St. Mary), Rotherhithe: the Bills after this were not extended, but still London grew; and Mr. Rickman when he compiled the Census of 1801 included Chelsea, Kensington, Marylebone, Paddington, Pancras, within its limits. The new Tables of Mortality, first published in 1840, took in Fulham, Hammersmith, westward; Stoke Newington, Bow, and Bromley (Middlesex), eastward; Camberwell in the south, and Greenwich district, stretching down the river to Deptford and Woolwich; Clapham, Battersea (exclusive of the detached Penge Hamlet), Wandsworth, Putney, Tooting, and Streatham were added in 1844; Hampstead fell in with the Lewisham District in 1846. Such is the London to which the Weekly Tables of Mortality relate. Its population on the same area was 958,863 in the year 1801, when the first English Census was taken; and 2,803,989 in the year 1861.

The enumerated population of London on the night of April 2nd 1871 was 3,251,804. But this is now only a part of London; its population in intimate fusion and close relation, has overflowed these bounds, and within the radial lines of the Metropolitan Police District, drawn from 12 to 15 miles around Charing Cross, the population is 3,883,092. This embraces, indeed, several towns, and covers 687 square miles, equivalent to a square of territory of 26¼ miles to the side. Beyond these limits men reside who visit London daily; and this will partly account for the rapid increase of Tunbridge, Hastings, Brighton, and other outlying places.

The police circle round Charing Cross, however, contains all that can be reckoned as properly within the limits of London; and is indeed too extensive for a natural boundary. For many of the parishes within the police district are entirely rural, and are quite sequestered from the great city. To the eye, from Holwood in the south, near the source of the Ravensbourne, and by the ruins of an old Roman city, the dome of Saint Paul's and a thin cloud of smoke are almost the sole signs of the millions living along the valley of the Thames. The larks and the nightingales sing in the surrounding glades; while around all the railway stations houses are springing up; and at several points are large towns, of which Croydon is an example, chiefly bound to London by the daily intercourse of their populations.

English institutions are flexible, but it is with difficulty they keep pace with and meet all the exigencies of the increasing population; this great fact has not hitherto been sufficiently taken into account in legislation; so boundaries are not adjusted, streets are not widened always to meet changes in the conditions of a city. London is perhaps an extreme, but

it is at the same time a typical instance. Municipal organization, with its historical associations, and working on the whole so well all over the kingdom, is, as has been seen, withheld from three millions of the inhabitants of London. It is however replaced to some extent by the Metropolitan Board of Works. On the Census night the population within the municipal limits was 74,732; within the Tables of Mortality 3,251,804; within the parliamentary boundaries 3,008,101; within the limits of the Metropolis Local Management Act 3,264,530; within the London School Board District 3,265,005; within the Police circle 3,883,092.

The population within the City has decreased; the population within the Tables of Mortality has gone on increasing, at a decreasing rate, because the building area is limited; but the actual population within the 12 to 15 miles radius has increased rapidly and steadily, or rather at a slightly increasing rate. The increase is now going on within that wider area at the accelerated rate of 1·88 per cent. per annum, and shows no sign of abatement. This is seen in the annexed Table.

POPULATION of LONDON, 1851–61–71.

YEAR.	Metropolitan and City Police Division.	Registration Division.	Outer ring not included in Registration Division.
1851	2,680,735	2,362,236	318,499
1861	3,222,720	2,803,989	418,731
1871	3,883,092	3,251,804	631,288

ANNUAL RATE of INCREASE per Cent. of POPULATION, 1851–61–71.

YEAR.	Metropolitan and City Police Division.	Registration Division.	Outer ring not included in Registration Division.
1851–61	1·86	1·73	2·77
1861–71	1·88	1·49	4·19

The population of the ring round the district of the Metropolitan Board of Works has increased 4·19 per cent. per annum, or more than 50 per cent. in ten years, and there being no adequate provision for the sanitary purification of this area, which is shut out from the system of sewers lately created, it is in imminent danger.

Looked at in any light, the magnitude and growth of London are marvellous; and the causes invite the careful scrutiny for which the subsequent analysis of the facts collected at the Census will serve as material. It has endured many struggles since its first obscure origin; it was not accepted without trial as the capital of the kingdom; at every increase it had to encounter some fierce epidemic; pestilences of various kinds infested it; the black death did not spare it, nor the sweating sickness; great plagues pursued it through the seventeenth century; great fires burnt down its combustible dwellings; Queen Elizabeth endeavoured to stop its growth, so did the first Stuarts; it was long left imperfectly supplied with water, light, police, government; its air was soiled with smoke; its sewers at first were badly made, and then cesspools were discharged into the river from which its waters were drawn, and thousands died of the last Asiatic plague; it was prized by Shakespeare and Milton, but Cobbett nicknamed it The Wen, Price called it one of the graves of mankind, and the State showed it no favour; yet here, unsurpassed by any city in health, full of riches, and rich above all things in men, in the year 1871 she stands by her river, her railways, her public edifices, her grand embankment, her magnificent bridges, the Queen City of the World.

The natural place for the capital of a kingdom isolated is in its centre, as is seen in Madrid in Spain; but in a system of States such as exist in Europe and America, the capitals are drawn towards each other from the centres of their country towards a common centre. Thus the capital of England is naturally found near its south-eastern angle, over against the capital of France; where it enjoys such advantages as Camillus claimed for Rome, but in a higher degree: *Non sine causâ Dii hominesque hunc urbi condendæ locum elegerunt, saluberrimos colles, flumen opportunum, quo ex mediterraneis locis fruges devehantur, quo maritimi commeatus accipiantur; mare vicinum ad commo-*

*ditates, nec expositum nimia propinquitate ad pericula classium externarum: regionum Italiæ medium, ad incrementum urbis natum unice locum.**

On a tidal river, and not many leagues from the sea, England has placed her capital, in convenient proximity to other countries, open for all commerce and friendly intercourse, and well forward in front of the great mass of her forces, as if she knew no fear. And, indeed, among all the calamities that have befallen London, it has never since the Norman Conquest been for an hour in the possession of a foreign foe: her first line of defence lying in the south-eastern counties, to which we now pass, and in the sea itself, covered for centuries by their maritime population.

The Registration Division of London is made up of parts of the under-mentioned three counties, the area and population of each part within the Metropolitan limits being as follows:—

Counties.	Area in Acres.	Population enumerated.					
		1861.			1871.		
		Persons.	Males.	Females.	Persons.	Males.	Females.
Middlesex, part of -	32,455	2,030,814	939,091	1,091,723	2,285,672	1,061,162	1,224,510
Surrey, part of -	22,951	579,748	271,848	307,900	740,680	350,843	389,837
Kent, part of - -	22,591	193,427	96,842	96,585	225,452	107,259	118,193

The natural increase of the population, represented by the excess of registered births over deaths, during the ten years 1861–70 was 331,599 in this division.

The remaining parts of these three counties are included in the Second and Third Registration Divisions.

2. South-Eastern Division.

Counties of Kent and Surrey (except parts in London), Sussex, Southampton, and Berks.

This great division lies south of London, between the Thames and the sea; and from Thanet extends westward beyond the Southampton Waters, and Winchester, the ancient capital of Wessex. It contains men of Kent, Kentishmen, South Saxons, and West Saxons: it touches the Metropolis, with which it is closely associated by contiguity, and by its watering-places extending along the coast from Worthing, Brighton, and Hastings, to Margate and Ramsgate; but besides these towns it has ancient central cities extending from Canterbury to Maidstone, Tunbridge, Reigate, Dorking, Guildford, and Basingstoke; and the many towns along the south bank of the Thames, Richmond, Kingston, Windsor, Maidenhead, Reading, and Abingdon. Over the South Downs, the North Downs, and the Weald of Kent, over the region of the great forest Anderida, so named, according to some authorities, because it was uninhabitable, two millions of people subsist, with cattle, sheep, horses, on a soil rich in fruits, grain, hops, pasture, and still to some extent with timber. The Medway is the main river; and there are, besides the tributaries of the Thames, the Stour, the Ouse, the Rother, the Itching, and at the extreme west the southern Avon.

On the Medway, in Strood, Rochester, Chatham, and Gillingham, around a great naval arsenal, is a numerous population lying near the mouth of the Thames, and connected by Sheerness and the people of the Cinque Ports, where the Lord Warden holds his court—by Sandwich, Deal, Dover, Folkestone, and Hastings—with the great naval fortress of Portsmouth. The whole of this coast swarms with a seafaring population, which has ever been the first line of defence, and the sure arm of the great naval operations. The ground is important. Here Cæsar disembarked, the Saxons landed, and William the Conqueror fought the decisive battle which gave him ultimately the possession of the capital, and the kingdom of which this province is now the shield.

Iron was formerly manufactured in the forests, where wood and ore abounded; guns were made; ships were built; and the Flemings introduced their broad-cloth manufacture; so that here were the manufacturing districts of those ages; the "Grey-coats of Kent" were active in county politics, and the population, headed by such spirits as Wat Tyler and Jack Cade, attacked the Government in London. Later disaffection only survived in the smuggler. The counties are now essentially agricultural; but there are extensive manufactures of paper, powder-mills, the great dockyards of Chatham and Portsmouth where thousands of men are employed, and the camps of Shorncliffe and Aldershott; besides the ornamental population of the charming watering-places on the coast.

* Livy, lib. v., s. 54.

The population of the counties at the two last Censuses is given below, parts of Surrey and Kent being, as it will be borne in mind, included in the Metropolis.

Counties.	Area in Acres.	Population enumerated.					
		1861.			1871.		
		Persons.	Males.	Females.	Persons.	Males.	Females.
Surrey - -	478,792	831,093	393,647	437,446	1,090,270	515,326	574,944
Kent - -	1,039,419	733,887	369,129	364,758	847,507	416,400	431,107
Sussex - -	936,911	363,735	174,982	188,753	417,407	199,377	218,030
Southampton -	1,070,216	481,815	246,585	235,230	543,837	274,407	269,430
Berkshire - -	451,210	176,256	86,875	89,381	196,445	97,007	99,438

The following cities and boroughs are included in the counties:—

		Pop. 1861.	Pop. 1871.
Surrey - -	Kingston-on-Thames -	9,790	15,257
	Reigate - - -	9,975	15,916

	Windsor - -	9,520	11,769

The increase of population in the division, exclusive of the parts of the counties in London, is 318,705. There are 341 persons to a square mile. The annual rate of increase in the 10 years 1861–1871 was 1·60 per cent. The registered births exceeded the deaths during the 10 years 1861–70 by 260,625.

3. South Midland Division.

Counties of Middlesex (except part in London), Hertford, Buckingham, Oxford, Northampton, Huntingdon, Bedford, and Cambridge.

This region, north of London on the watershed of the Thames facing the south, stretches over the Cam to the Nene, and from the river Lea to the western extremities of Oxfordshire. It was held by the Mid-Saxons and South Anglians. It consists now of eight fine agricultural and pastoral counties, with many parks, hills, valleys to the west, and marsh land to the north-east. The population, after deducting the part of Middlesex in London, is 1,442,567, occupied chiefly in agriculture, but also largely in the manufacture at home of lace, strawplait, shoes, without the use of steam-power. Silk is also manufactured to some extent. It is the seat of the great national Universities on the Isis and the Cam. The density is 288 persons to a square mile. The population has increased by 147,052, or by 1·08 per cent. per annum. The increase is to a considerable extent due to the overflow of London in Middlesex and Hertfordshire. But there is an increase in all the counties except Huntingdon, and notably in the districts of Wycombe, Northampton, Wellingborough, Peterborough, Oxford, Cambridge, Bedford, Luton, and Chesterton. The registered births in the division exceeded the deaths during the 10 years 1861–70 by 179,679.

The following are the populations of the counties :

Counties	Area in Acres.	Population enumerated. 1861. Persons.	Males.	Females.	1871. Persons.	Males.	Females.
Middlesex - -	180,136	2,206,485	1,022,500	1 1 3,685	2,538,882	1,181,269	1,357,613

4. Eastern Division.

Counties of Essex, Suffolk, and Norfolk.

This division extends from the east of London to the German Sea and the Wash, over three large counties, peopled of old by East Saxons, East Angles, and tribes of seafaring Northfolk. The Flemings brought their manufactures to Norfolk. Silk, paper, and some other manufactures are carried on, but inland the division is essentially agricultural, and on the coast maritime ; there is a hale fishing and maritime population round the shores, of which Ipswich and Yarmouth are the centres. The population of the fishing towns is more correctly given now than it was in 1861, when the fishermen and seamen out at sea on the Census night were classed with seamen and others in the home trade, whereas they have now been referred to the towns to which the boat or ship belongs.

The population of the division is 1,218,257, and the increase in the 10 years is only 75,695, which is chiefly due to the overflow of London into Essex, and to the increase of population on the north side of the Thames. Ipswich, Mutford including Lowestoft, Yarmouth, and Norwich also increased. The increase of population was at the rate of 0·64 per cent. per annum. The mean density is 243 people to a square mile. The registered births exceeded the deaths during the 10 years 1861–70 by 145,061.

Counties.	Area in Acres.	Population enumerated. 1861. Persons.	Males.	Females.	1871. Persons.	Males.	Females.

* Census not taken in term time. The members of the Universities, including Undergraduates, were subsequently enumerated by the favour of the Vice-Chancellors, and the results will be published hereafter.

The following cities and boroughs are included in the counties :—

		Pop. 1861.	Pop. 1871.
Essex	Colchester	23,809	26,361
	Harwich	5,070	6,107
Suffolk	Bury St. Edmunds	13,318	14,928
	Ipswich	37,950	43,136
	Sudbury	6,879	6,908
Norfolk	Yarmouth	34,810	41,792
	Norwich	74,891	80,390
	Kings Lynn	16,170	16,459

Resuming: the second, third, and fourth divisions touch London by their borders, supply it with immigrants in great numbers, and are blended with it, so as to constitute one continuous population of 8,078,845, subsisting on 10,558,701 acres of fertile land and profitable water, which have for centuries yielded in grain, hops, fruit, vegetables, dairy produce, game, fish, sheep, cattle, nearly all the subsistence the inhabitants required. Its Southdown sheep, Sussex cattle, Suffolk horses, are of the finest breeds. It is on a chalk formation, with green sand, gravel, clay, alluvial deposits, and timber, supplying thus the materials for brick and dwellings; its waters are abundant, and though hard, remained, until recent years, unpolluted. The marshes along the Thames and on the margin of the sea, with imperfect sanitary arrangements in the towns, keep up too high the rate of mortality; still the registered births within the last ten years exceeded the deaths by 916,964, while, after the balance has been struck between emigration and immigration, an increase is left in the population of 989,267.

5. South-Western Division.

Counties of Wilts, Dorset, Devon, Cornwall, and Somerset.

This division lies far west of London, yet the maritime population forms a continuous line with that encompassing the other seaside divisions. The men of boats and ships may be traced from Kings Lynn, Yarmouth, Harwich, the Thames and Medway, from Sheppey, Thanet, Deal and Dover, Folkestone, Hastings, Beachy Head, through the Solent to Poole, Weymouth, Plymouth with Devonport, and Falmouth, and hence, turning round the Scilly Isles, they follow the coast by the Bristol Channel to the Avon. On the plains of Wilts to the north and in Dorset is the chalk, and to the south the clay formation; then the oolitic and lias formations are crossed and you enter the fine country on the new red sandstone formation leading down to Exeter,—the capital of this south-west province; finally the old red sandstone,—named from Devon, Devonian,—and Exmoor and Dartmoor, and granite rocks with interfiltrated veins of tin and copper ores terminate at Land's End in the face of the Atlantic Ocean. With her marshes and many intermingled formations, Somerset over the Mendip hills approaches Bristol on coal fields, connecting its population with Wales and the next division.

The Exe and the Tamar are the principal rivers, and their streams descend from the northern ridge of the high moors of this richly watered Division. The many inlets around the coast afford harbourage to fishing boats and ships, so that the counties preserve the maritime character they held when Drake met the Armada, while they also abound richly in agricultural products. But copper and tin mining have been the special pursuits of many districts of Devon and Cornwall. The population is well-marked, and is found to differ, as the West Saxons are left through the regions which the tribes of *Wilsetan*, *Sumersetan*, *Defenesetan* occupied round Stonehenge and Glastonbury, until the Cornish men recall their connexion with Wales, from which they are only separated by a channel of the sea, and with some southern population which visited the Cassiterides from Spain, Asia, or Africa, through the Mediterranean. The beautiful Devon breed of cattle is well known, so are the sheep and the ponies; and there are other indications of variation in the influences which shape organic life. Besides the lace-making about Honiton, and the coal-mining element that crops up in the north, there is an important manufacturing region round Bradford in Wilts, where the famous West of England broad-cloth is still made.

Torquay on Torbay where William III. landed, Dawlish, Teignmouth, and other delightful spots on the south coast, are places of resort; so are Ilfracombe and other places of North Devon. The historic fame of Bath is still upheld by that elegant city and its waters.

This division is the most extensive of the ten, and its area is nearly five million acres (4,994,280). The five counties contained 1,879,898 people; so there is a slight increase of 44,035 since the Census of 1861. The other counties show some increase, but in Cornwall there is an absolute decrease of 7,292 inhabitants; this is due to the emigration of miners to other parts of England, or over the Atlantic to the copper mines abroad, where their services are well paid; while the increased production of that metal supplies abundant and cheaper materials to our manufacturers. There is consequently a great excess of females in both Cornwall and Devon, as compared with Dorset, where the population is more stationary.

The division is rather the least dense of the ten; but it is nearly the same in density as the Eastern. There are 241 persons to a square mile. The increase of population has been only at the annual rate of 0·24 per cent. The registered births during the ten years 1861–70 exceeded the deaths by 218,844.

6. West Midland Division.

Counties of Gloucester, Hereford, Salop, Stafford, Worcester, and Warwick.

Bristol, one of the great old commercial cities of England in this division, is on the north side of the Avon, emptying its water into the Channel to which the city gives its name. And Staffordshire is round the head streams of the Trent; but five of the

counties are in the Valleys of the Wye and of the Severn descending from the mountains of Wales.

The division includes 3,942,161 acres of land, generally fertile and well watered; it can boast of two breeds of sheep—Cotswolds and Shropshire Downs; while in Hereford it can boast of its cattle. This division is distinguished from all those preceding it by its coal-fields, iron-stone, and iron-works; and by the manufactures founded in the Potteries by the industry of the people and the genius of Wedgewood; and the still greater multifarious metal industry of Birmingham, the great central city of England, in the centre of other cities and agglomerated populations. Here Watt found scope, and in Bolton help, for the development of his great inventions. In the Black Country besides smoke and iron, every kind of useful tool is manufactured. Shrewsbury, Worcester, and Gloucester are on the Severn, which divides their shires, evidently constituted after bridges had spanned that river. Clifton, Malvern, and Cheltenham are pleasant and popular sanitary resorts. The waters of the Severn and the Wye are softer than the waters of the Thames, as they descend from the mountains of Wales; and from the Longmynd, the Caradoc, and the hill fastnesses where Caractacus withstood to the last the Roman power. Here were the valiant Silures; and here is the centre of Sir Roderick Murchison's Silurian kingdom. The military spirit was kept up in Mercia of which this was a part, by warfare with the Welsh, and with the other Saxon kingdoms of the Heptarchy. Offa's dyke and the numerous castles mark the strife from which these midland people were not exempt by distance from the sea.

The population of this great division was 2,720,003, and its increase in the last ten years was 271,957. The annual increase was at the rate of 1·06 per cent.; but the natural increase by excess of births over deaths, although the mortality was often high, was 369,676 in this prolific race; so that besides providing arms for its own industry it sent out flights of emigrants.

The density of the population is 442 to a square mile.

Upon referring to the counties it will be seen that the increase is least in Hereford, greatest in Stafford. Of the cities and towns, Bristol has increased largely, and so have all the Pottery districts. To get the full increase of overflowing Birmingham, the two districts of Kings Norton and Aston must be taken into account; the population of the three districts amounts to 444,545.

7. North Midland Division.

Counties of Leicester, Rutland, Lincoln, Nottingham, and Derby.

This division is much less populous than the sixth; it covers 3,543,397 acres; and while Lincoln is the largest except York, Rutland is the least county in England. Its soil is generally fertile; but it varies infinitely, and so does the scenery, from the fens, moors, and wolds of Lincoln to the hunting fields of Melton Mowbray in Leicester and the High Peak of Derbyshire; from the aguish marsh-land to the delightful Matlock. The fair Trent winds its way through the whole region down to the Humber. The Leicester breeds of sheep and cattle are well characterized; and so are the heavy Lincoln horses. The population is largely impregnated with the blood of the Danes, who occupied the Five Towns and the coast line. The railroads have opened the coal-fields of these counties to the south; and they now compete with Newcastle in London. Great Grimsby, at the mouth of the Humber, has recently made enormous strides in population. Nottingham district and the surrounding districts have increased rapidly, and so have Derby and Chesterfield. Lincoln shows an increase; of Leicester the increase can scarcely be matched. The population of the seventh division is 1,406,823; the increase in ten years, 117,443. This is less than the natural registered increase of 183,034 births in excess of deaths. The density of population is low, it is expressed by 254 persons to a square mile. The annual rate of increase was 0·88 per cent.

Derbyshire	Derby	43,091	49,793
	Chesterfield	9,836	11,426

8. North-Western Division.

Counties of Chester and Lancaster.

This is the smallest of the divisions in extent and the most populous; on 2,000,227 acres the Census Enumerators found 3,382,590 people. The increase of 447,050 in 10 years is almost exactly the same as the increase of London. And Manchester and Liverpool are together indeed a Northern capital, not only in respect of their vast

mercantile and manufacturing interests, but of their social, political, and scientific activity. The two counties are separated by the Mersey, which through the Weaver collects the waters of Cheshire, although Chester lies on the Dee. Besides the flat plains, so favourable for the conveyance of goods by road, canal, and railway, Lancashire beyond Morecambe Bay ascends to the hills overhanging Windermere and to the Duddon Mouth. The Ulverston district, including Barrow, is the seat of mineral enterprise, where the population has increased in 10 years by 19,294. Lancashire is the seat of a great variety of works; but the coal within easy access, the facilities of getting cotton by sea through Liverpool, and the wonderful enterprise of the people, constitute it the great seat of the cotton industry of the country. The tide of prosperity of this great division is now flowing again; but it was interrupted for a time during the ten years by the American War, otherwise the population would certainly have been greater than it is to-day. This is indicated by the fact that the usual reserved cotton imports of 1858–60 into the United Kingdom, amounting to 1,000 million pounds, fell to 309 and 428 million pounds in the two years 1862–3, but again rose in 1868-9-70 to nearly the old standard.* The interval, not of pause, but of retarded progression, will be turned to good account if the dwellings are constructed on improvement plans, and the towns are rendered clean, sweet, and so healthy as to ensure the development of the Lancashire breed in physical and intellectual qualities as evident as the improvements in the products of their industry. The rainfall of these counties is large; water abounds and the supply of Manchester is drawn from the hills. The rivers are polluted by the refuse of manufactures, and to some extent by sewage, although the impurities, as a general rule, are retained about the houses, and are not discharged into the sewers.

Cheshire is rich in salt and cheese, two of the primary necessaries of life; its salt mines were worked with unabated prosperity, but its dairies suffered as much from the cattle plague as the factories of Lancashire suffered from the cotton famine. The large towns show generally little growth, except Chester, which is increasing, and Birkenhead, which already contains 65,980, and is probably only awaiting the tunnel under the Mersey to grow still more rapidly. Crewe, Northwich, Runcorn, and Altrincham have increased rapidly. Manchester city contains 355,665 inhabitants; but Manchester and Salford are as much one city as London and Southwark; and parts of Chorlton belong to the same great community; so that a better conception of Manchester as it is generally understood will be obtained by putting these three districts together, which contain 592,164 people. So Liverpool has 493,346 inhabitants; but adding together the population of the Liverpool district and its contiguous district West Derby, the aggregate population is 581,203, which becomes 660,510 by the annexation of Birkenhead. Nearly all the numerous Lancashire towns increased their numbers; only in Ashton-under-Lyne is there a falling off. The population of every sub-district of Liverpool district decreased, as great numbers were living in 1861 in cellars and rooms utterly unfit for human habitation; so there have been clearings, and, as in London, the centre of the town has been to some extent deserted by the merchants, who have carried their household gods to the surrounding region. Thus, while the Liverpool district decreased by 31,389, the West Derby district increased by 117,005; the Liverpool people often live in districts at a considerable distance from the Exchange. The borough of Liverpool increased by 49,408; the borough of Manchester by 16,943. Each of four of the sub-districts of the Manchester district exhibits a considerable decrease of population. In all our large towns this transfer of people from the centre to the circumference is going on. The town of Barrow-in-Furness is a remarkable instance of rapid progress; in 1861 it formed part of the parish of Dalton-in-Furness, and had no separate mention in the Census Returns; it is now a municipal borough, and has a population of 17,992.

This eighth division is the densest of all the divisions except London; there are 1,082 persons to a square mile. It increased at the annual rate of 1·43 per cent., and its registered births during the 10 years 1861–70 exceeded the deaths by 353,014.

9. Yorkshire.

This great county is a division in itself; its area is 3,654,636 acres, or 5,710 square miles; its shores run north-westwards from the Humber to the Tees; and its Ridings stretch nearly all across the country to the Irish Sea, from which it is divided by the English Pennine chain of mountains and by Lancashire. As Lancashire looks to the south-west towards the sun as he sets, Yorkshire slopes towards the south-east to receive his morning rays; Lancashire is bathed with the west winds and their copious rains, Yorkshire faces the east winds, and, except on its high moors, is satisfied with less copious showers; Lancashire has before it the Irish Sea and the Atlantic Ocean, Yorkshire the North Sea and the Baltic; Lancashire confronts the American Republic, Yorkshire the German Empire.

Yorkshire is in some respects a northern compendium of England. It has the marshes, the alluvial soil, and the chalk cliffs of the south; the oolitic formation of the midland counties; the new red sandstone formation, the limestone, and the rich coal measures; it has mountains, crags, moors, wolds, and fair vales adorned by many an abbey; there are Craven, Cleveland, Wharfedale, Wensleydale, and Teesdale; its waterfalls are among the finest known; the rivers, with the Ouse as their chief, fed by many sister streams, water the whole land, supply the canals, and are discharged into the estuary of the tidal Humber, on which Hull and Great Grimsby are harbours. Yorkshire occupies the whole basin of the Humber and of its affluent streams except the Trent. Railways connect all its great centres of population.

The country of the Brigantes was specially affected by the Romans; Agricola, it is said, founded York, which became the *Altera Roma* of his countrymen, which was famous once for its shipping and commerce, now descended to points nearer the coast; it was the Deira—the Deerland—of the Saxons; here the northmen fought William I. and were conquered; the county was devastated, but soon recovered its station in English history. The Battle of the Standard, the battle where the Houses of York and Lancaster on a Palm Sunday fought out their great strife, and left on the fields of Towton thousands of slain—and Marston Moor in the last English civil war, finally attest the importance of this great battle-field of the kingdom; on the Derwent, too, before, Harold had expended part of his forces in resisting the onslaught of the fleet of northmen on the east side of the kingdom, while the more formidable foe aimed on the south side the main blow at the heart of his dominions.

This county is now settled down in peaceful industry; its arable lands and rich pastures are turned to good account; its breeds of horses are famous, and are as well characterized as its strains of men drawn from northern sources. The great Yorkshire coalfield is vindicating its importance; the ironstone is smelted, and iron and steel of the best quality are wrought, through many processes, into tools, knives, and machines

of every kind. The woollen, worsted, and linen manufactures have here flourished from time immemorial; the Flemings, when they were persecuted, found a hospitable reception, and have left traces of their blood in Yorkshire.

	Richmond - -	4,290	4,443
	Middlesborough (Parish)	19,416	39,434

The population of Middlesborough has increased with extraordinary rapidity, chiefly since 1851. The parish, including the township of Linthorpe, had a population of only 383 in 1831; its progress then became noticeable, and at the Census of 1841 it numbered 5,709 inhabitants; in 1851 there was a population of 7,893, which increased to 19,416 in 1861, and to 39,434 in 1871. It is now a Parliamentary as well as a Municipal Borough.

Relatively, the increase in Yorkshire is much greater than it was in the previous ten years 1851–61; and greater than the increase of Lancashire in the last ten years. The reason is easily explained; the American War, which was Lancashire's difficulty, was Yorkshire's opportunity, of which her sagacious heads not slowly availed themselves. The rise in the cost of cotton raised the demand for woollen stuffs, and wool was attracted in large quantities, as the Board of Trade returns show; independently of this circumstance, the supply and demand of wool, short and long, invaluable as the staple of clothing in these climates, and produced in immense quantities by our colonists, increased. The Board of Trade returns show that in the three years 1858–60, and the three years 1868–70, the average annual import of wool (sheep, lamb, and alpaca) rose from 136 million to 258 million pounds. Adding wool of home growth and deducting wool exported, no less than 288,512,000 lbs. were left, according to the estimate of Mr. A. Hamilton,* for home consumption in 1869. The increase of production has been greater than the increase of workers, for the obvious reasons that coal power is so largely converted into work by the steam engine and improved machinery.

* Journal of Statistical Society, December 1870.

The excess of births over deaths in the districts of the division, which are not always coincident with the county boundaries, wa· 286,358, while the increase of enumerated population in the same districts was 379,758. The increase is at the rate of 1·74 per cent. annually; 18·84 per cent. in the ten years. The population is distributed very unequally; it is thin on the moors and wolds, dense on and near the coalfields. There are on an average 419 persons to a square mile; 1·53 acres to a person.

The increase of population is the greatest in the West Riding, least in the East Riding.

Since the last Census the population of Huddersfield has been doubled, of Halifax nearly doubled; Bradford has increased largely; Leeds, the centre of the principal manufactures, has also increased, but not so fast as the Dewsbury district. Sheffield, the great city of steel and cutlery, has an ample increase; so has Hull, the great eastern port. Scarborough, the delightful watering-place of the north, is increasing every year in attraction and population. Guisbrough district, in the North Riding, south of the Tees, is increasing rapidly in population; so also are parts of the Whitby and Pickering districts.

10. Northern Division.

Counties of Durham, Northumberland, Cumberland, and Westmorland.

This division extends from sea to sea, and commencing in the coalfields which have for centuries supplied English hearths with fire, is crowned by primitive mountains, pastures, and inland lakes of surpassing beauty; it is the border land on which the martial spirits of Scotland and England debated sword in hand, and fought out their feuds until the nations of one blood were united. Otterburn, Humbleton, Pepperdean, and Flodden, as well as the Roman Wall, remain as memorials of the strife of ages, between people now happily at one, but still separated conveniently for some administrative purposes, and among others for the Census, which is, north of the border, taken by Mr. Dundas the Registrar General of Scotland, and Dr. Stark.

This north country, far from the south, in the Northumbrian kingdom asserted its individuality, which is upheld now by the people in physical character, and in some respects in dialect. The gray coats may have gone, but lairds and statesmen remain. In education the division is in advance of all the rest. Cumberland has given birth to at least one great poet, and the lakes have attracted others. Keswick and Rydal are classic ground. Skiddaw, Helvellyn, Derwentwater, and Ullswater, all the fells, pikes, tarns, and streams around them down to Windermere, which Lancashire claims, attract thousands of travellers to their mild and changeful beauty, where sunshine and showers contend. Rain falls in such quantities that proposals have been made to carry this most precious fluid thence to the Metropolis. It is not on these regions that the increase of population depends, and still less on the moor-lands, or even on the advanced agriculture; nor so much on the Cumbrian plains, along the Eden, over the vale, on the red sandstone formation; nor on the pastures of the Tees, where the short-horn breed of cattle drew one of their first names from Durham; nor on the Cheviots, where the well-known breed of sheep abound; but on the great coalfields round Newcastle and Durham, eastward, the smaller field round Whitehaven and Workington, westward, in conjunction with the iron smelting, the manufacture of machinery and of chemicals, the shipbuilding, and the energy and genius of the men.

The area of the division is 3,492,322 acres; the population is 1,414,066; and through the interference of the extensive moors and mountains, the density of the population, assumed to be equally distributed over the whole face of the country, is expressed by only 259 persons to a square mile.

The increase of population in the ten years is 262,694. This increase, in proportion to the original population, exceeds the increase of Yorkshire, and therefore of all the eleven divisions; it is at the rate of 2 per cent. per annum; in the ten years, this population, in the aggregate, increased 23 per cent. The registered births during the 10 years 1861–70 exceeded the deaths by 199,291.

The subjoined Table will show how the several counties increased. Some of the old towns show little increase; this is the case with Durham, Morpeth, Berwick, and Cockermouth; Whitehaven decreased in population. Fair Carlisle, famous in many ways, and not least for its early statistics, increased to some extent, and so did Kendal, but of Stockton the population was doubled. The population of the towns of Sunderland, South Shields, Gateshead, Newcastle, and Tynemouth increased largely; but the increase, not being confined to municipal limits, is best shown by referring to the districts: Thus in Durham the increase of the four districts of Darlington, Stockton, Hartlepool, and

Auckland was 86,751; the population of the Durham district increased by 21,733, and its population grew to 92,007; the population of the five districts—of Sunderland on the Wear, of South Shields, Gateshead, Newcastle, and Tynemouth on the Tyne—increased by 109,623, and amounted to nearly half a million. On no river, perhaps, in the world is industry evolving useful products at a more rapid and increasing rate.

Counties.	Area in Acres.	Population enumerated.					
		1861.			1871.		
		Persons.	Males.	Females.	Persons.	Males.	Females.
Durham - -	622,476	508,666	258,297	250,369	685,045	352,987	332,058

	Cockermouth (P.) -	7,057	7,057
	Whitehaven (P.) - -	18,842	18,446
Westmorland -	Kendal - - -	12,029	13,442

Now, having gone over the country rapidly, from London and the Scilly Isles to Berwick and the Solway, we may turn from the mountains of the north of England to the mountains of Wales, where similar geological conditions exist.

11. Welsh Division.

Cambria has a nationality of its own as distinct as either Scotland or Ireland. It is a principality; and the fact deserves recognition in the Census. In this spirit the Welsh division has been formed. It takes in the whole country from Holyhead and Saint Davids to the Wye and the Dee; so it includes Monmouthshire, essentially Cambrian, which was detached from Wales by Henry VIII., when the Lords of the Marches were abolished, and the rest of Wales was divided into twelve counties, six in North Wales, and six in South Wales.

The territory is 5,139,159 acres, and it exceeds in area any English division. The population is 1,426,584; the increase in the last ten years has been 125,680. The natural increase, as shown by excess of births over deaths, is 177,632; so that the influx of immigrant workpeople into the mining districts does not equal the efflux of emigrant Cambrians. The increase of population in the 10 years is rather less than 10 per cent.; the annual rate of increase is 0·93 per cent. The bulk of the population is concentrated in a few counties,—Glamorgan, Carmarthen, Carnarvon, Pembroke, and Denbigh, besides Monmouth; in the other counties the population is scanty; so that the density of the Welsh division is only 178 persons to a square mile. There are 3·60 acres to a person.

The area of Wales, strictly within its borders, is 4,734,486; the population 1,216,420.

The population of the Division depends much, of course, on its pastoral and agricultural industry. Its goats and well-known ponies go for little; but its small black cattle are largely grown, and the wool of the sheep supplies materials for the excellent flannels of

the country. Welsh mutton is a well-known product. The grain produce in Glamorganshire and some other counties rewards the diligence of the farmer; but the agriculture of the principality is not yet so conspicuous as it might be for excellence. The primitive mountains have at times yielded to adventurers treasures of lead and of some of the more precious metals. The slate quarries especially of Cardiganshire yielding a most useful product always employ many hands, which are not likely to decrease. The copper-smelting industry in which the Welsh excel has employed great numbers at Swansea; but it is now exposed to keen competition. Tinned iron is an important product of Wales. Flint and Denbigh in the north are more populous than they were, and are apparently successful in the branches of industry they are cultivating. But the rich coalfields, yielding coal of various qualities suitable to many purposes, the juxtaposition of ironstone with coal, the iron works of Merthyr Tydfil, with the convenient docks of Cardiff, have given a new phase to South Wales. The population of Glamorganshire in 1871 was 396,010; the increase in 10 years was 78,258. The districts of Cardiff, Pontypridd, Merthyr Tydfil, and Swansea show the greatest increase. The population of the Merthyr district was 104,110; Llanelly in Carmarthenshire increased, and the district contains 34,738 people; its steam-coal, iron, docks, and railway offer great facilities to profitable enterprise. The Carmarthen sub-district is decreasing, so is Narberth; Pembrokeshire, with its fine harbour of Milford Haven, declined in population, so did Anglesey. Wrexham district increased, and has now a large population. The watering-places of Wales along the coast of Denbigh and Flint attract large numbers of people, so do Aberystwith and Tenby; Conway, Chepstow, and Tintern Abbey, and the valley of the Wye, Brecon, the waterfalls, the rivers, the mountain scenery crowned by Snowdon, all allure not only summer travellers but permanent inhabitants to this land, which is still redolent with beauty, and traditions of poetry, and music on the harp. In this day the land of Cadwallon, Howel, Llewellyn, and Taliessin has neither curses nor tears for England, and while she cherishes her ancient tongue will, it may be hoped, no longer forego the use of the first language of the civilized world.

At the next Census in 1881 it may not be necessary, as it was in 1871, to print Welsh schedules for the use of a certain number of the Welsh people.

Counties.	Area in Acres.	Population enumerated.					
		1861.			1871.		
		Persons.	Males.	Females.	Persons.	Males.	Females.

	Carnarvon - -	8,512	9,370
	Beaumaris - - -	2,558	2,234

III. POPULATION IN PARLIAMENTARY BOROUGHS AND IN THE REST OF THE COUNTRY.

The area of the parliamentary boroughs has been increased by the last Reform Act; and it may be interesting to show here in one view how their population has been affected in the last twenty years.

	Population as enumerated in		
	Parliamentary Boroughs.	Counties outside Parliamentary Boroughs.	Total.
1851 -	7,438,679	10,488,930	17,927,609
1861 -	8,638,569	11,427,655	20,066,224
1871 -	10,655,930	12,048,178	22,704,108
	Increase in two periods each of Ten Years.		
Between 1851–61 -	1,199,890	938,725	2,138,615
1861–71 -	2,017,361*	620,523*	2,637,884

* This increase is affected by changes of electoral area as well as by natural growth of population.

The facts are shown for the several boroughs and parliamentary divisions of counties in the Tables (pp. 4–6, and 9–15).

IV. MUNICIPAL BOROUGHS.

The population of the municipal boroughs, including the city of London, was 6,581,599; while the population outside the boroughs was 16,122,509. The exclusion of all the metropolis, except the city, produces derangement in the proportions, which is got rid of if we take the population of the Divisions, exclusive of London; then the population of 6,506,625 in the municipal boroughs out of London will contrast with 12,945,779, also out of London, not incorporated, but under Vestries, Boards, or other substitutes for the well-approved English system of municipal government.

V. URBAN AND RURAL POPULATIONS.

The following table shows the movement of the population between the three Censuses of 1851, 1861, and 1871 in the districts containing the chief towns, distinguished from the rest of the country, as in the Quarterly Returns.

	Area in Acres.	Years.	Population enumerated.	Decennial Increase.	Decennial Increase per Cent.	Annual Rate of Increase per Cent.
ENGLAND AND WALES -	37,324,883	1851	17,927,609	2,138,615	11·93	1·13
		1861	20,066,224	2,637,884	13·15	1·24
		1871	22,704,108			
URBAN DISTRICTS: 141 Districts and 57 Sub-districts, including the Chief Towns - -	3,287,151	1851	9,155,964	1,774,877	19·39	1·79
		1861	10,930,841	1,969,456	18·02	1·67
		1871	12,900,297			
RURAL DISTRICTS: the remainder of England and Wales, comprising the Small Towns and Country Parishes - -	34,037,732	1851	8,771,645	363,738	4·15	·41
		1861	9,135,383	668,428	7·32	·71
		1871	9,803,811			

The urban districts have in the last ten years grown more than twice as fast as the country districts; they contain nearly thirteen millions of people, and increase at the rate of 1·67 per cent. annually by birth and immigration. The more rapid growth of the rural districts implies that many of them are assuming the character of towns.

VI. SEXES.

The number of women and girls enumerated was 11,663,705; of men and boys, 11,040,403; so there was an excess of 623,302 women and girls in England and Wales on the Census night. To the men may be added a certain number of men abroad in the army, navy, and merchant service, which are not yet known, but may be for the moment estimated at 149,254. By adding this number to the males, they become 11,189,657; and the disparity is reduced to 474,048. This subject will be referred to again.

VII. MARITIME POPULATION.

Besides a large maritime population in distant seas (97,700) on the Census night, and another large number yet unknown on shore at home, 61,434 have been returned in boats and vessels on canals or navigable rivers, or round the coasts, within the limits of what is called the Home trade, who have been added to the population of the respective ports to which their vessels belong, as there generally are their wives, children, and homes. Their distribution is thus summarized; 5,251 were in vessels attached to London, 10,973 to the South Eastern division, 4,806 to the Eastern division, 9,831 to the South Western division; the coasts of the North Western, of the York, of the Northern, and of the Welsh divisions were also abundantly surrounded by mariners and fishermen.

VIII. HOUSES AND FAMILIES.

The number of inhabited houses has increased by more than half a million; and the average number of persons to a house was 5·3. The number of separate schedules distributed to families and lodgers exceeded *five millions*.

	Inhabited Houses.	Families or single Lodgers supplied with Schedules.
1861 April 8 - - - -	3,739,505	4,491,524
1871 April 3 - - - - -	4,259,032	5,030,895
10 years increase - - -	519,527	539,371
Annual increase of Inhabited Houses -	51,953	53,937
Houses building - - - -	27,305	37,807

The number of uninhabited houses was 184,694 in the year 1861, and 260,178 in the year 1871. It must be borne in mind that the term "*uninhabited*" in the Census return simply implies that *no person dwelt or slept in the house on the Sunday night* preceding the enumeration. In towns many of these houses were occupied during the daytime. The enumerators were instructed to distinguish those cases in their memorandum books, which will be analyzed at a future period.

IX. THE UNITED KINGDOM.

1. Population.

The Census having been taken all over the kingdom simultaneously we are able, with the help of our colleagues in Scotland and Ireland, to submit here in summary, subject to any future correction of the unrevised figures, a statement of the population of the whole of the British Isles on the Census day. A provisional return is also added of the number of the army, navy, and merchant seamen known to have been absent on the Census.

——	Area in Acres.	Population on April 3d, 1871.			Proportion per Cent. of the Population residing in the several Parts of the Kingdom.
		Persons.	Males.	Females.	
UNITED KINGDOM -	**77,513,585**	**31,817,108**	**15,549,271**	**16,267,837**	**100·0**
England - -	32,590,397	21,487,688	10,437,053	11,050,635	67·5
Wales - - -	4,734,486	1,216,420	603,350	613,070	3·8
Scotland - -	19,639,377	3,358,613	1,601,633	1,756,980	10·6
Ireland - -	20,322,641	5,402,759	2,634,123	2,768,636	17·0
Isle of Man - -	180,000	53,867	25,691	28,176	·2
Channel Islands -	76,684	90,563	40,223	50,340	·3
Army, Navy, and Merchant Seamen Abroad	—	207,198	207,198	—	·6

The enumerated population of the United Kingdom, like that of its capital city, is variously defined for fiscal, statistical, and other purposes, as shown in the following table:

——	Population on April 3d, 1871.		
	Persons.	Males.	Females.
United Kingdom: *including* Islands in British Seas, and Army, Navy, and Merchant Seamen Abroad -	31,817,108	15,549,271	16,267,837
United Kingdom: *including* Islands in British Seas, but *excluding* Army, Navy, and Merchant Seamen Abroad - - -	31,609,910	15,342,073	16,267,837
United Kingdom: *excluding* Islands in British Seas, and Army, Navy, and Merchant Seamen Abroad -	31,465,480	15,276,159	16,189,321

The population of the Kingdom is never stationary: it is now increasing, as the returns show, at the rate of about 705 persons daily. In all official returns, it is usual to employ the population in the *middle of the year:* with that population the births, deaths, marriages, and other facts are compared, and the following table shows the population of the United Kingdom (*including the Islands in the British Seas, and the Army, Navy, and Merchant Seamen abroad*), estimated to the middle of the three Census years 1851, 1861, and 1871, with the intervening rates of increase. In our subsequent Report the estimated populations for the middle of the years will be given *exclusive* of the population of the Islands in the British Seas, and of the Army, Navy and Merchant Seamen Abroad.

POPULATION of the UNITED KINGDOM, *including the Islands in the British Seas, and the Army, Navy, and Merchant Seamen Abroad*—estimated to the *middle of the years.*

Middle of Years.	Persons.	Males.	Females.
1851	27,764,034	13,656,998	14,107,036
1861	29,358,927	14,397,427	14,961,500
1871	31,883,564	15,581,093	16,302,471
	Decennial Increase.		
1851–1861	1,594,893	740,429	854,464
1861–1871	2,524,637	1,183,666	1,340,971
	Decennial Rates of Increase (per Cent.)		
1851–1861	5·74	5·42	6·06
1861–1871	8·60	8·22	8·96
	Annual Rates of Increase (per Cent.)		
1851–1861	·56	·53	·59
1861–1871	·83	·79	·86

The actual increase in the two intervals, each of ten years, shows clearly how much the population has increased in numbers, and how much faster it has increased since 1861 than it did in the previous decenniad.

2. SEXES.

It is deserving of remark that the number of women and girls exceeded the men and boys at home by 925,764; after adding the soldiers and sailors abroad to the men and boys at home the excess of females is 718,566.

By a law of nature the sexes at adult ages exist in equal numbers, and accordingly we may expect to find the 718,566 absent males somewhere; unfortunately the recent Census returns of our own Colonies, or of our kindred United States, distinguishing the sexes, have not yet reached us; nor can we distinguish always in their previous Censuses the proportions belonging respectively to England and to other nations.

But the following facts show that the disparities in the sexes probably compensate each other in 1871, as they did ten years ago.

——	Males.	Females.	Excess of Males.
Australia (1861), exclusive of Tasmania - -	952,578	732,771	219,807
North American Colonies (1861) exclusive of Vancouver's Island - - - - - -	1,701,982	1,603,890	98,092
United States (1860) - - - - -	13,868,460	13,133,031	735,429
Excess of males in the Colonies and in the United States (1860 or 1861) - - - - -		1,053,328	

Those who seek to extend the sphere of labour for women will find therefore in Australia and America a most fruitful field for such of the sex as are willing to play a part in the foundation of the great States of the future.

3. EMIGRATION.

The emigration of natives of this kingdom has gone on steadily, but at a retarded rate, in the last ten years; thus their number in the ten years 1851–61 was 2,054,578
„ „ 1861–71 was 1,674,594

Decrease in the Emigration - 379,984

When it is considered that emigrants carry away not only their own numbers but the fathers and mothers of future children, it is evident that the decrease of the tide of emigration goes far to account for the increased growth of the population in the

last ten years. The American War retarded emigration, while employment at home increased.

To the emigrants should be properly added their increase in the interval between the Census periods, while the returning emigrants and the immigrants should be subtracted to get the true increment; but as these corrections operate in opposite directions, the emigrants may be added to the increase at home, and then the natural increase of the English race, in the decenniad from 1851 to 1861 was 3,649,471; and in the decenniad from 1861 to 1871 it was 4,199,231. The increase of the English people, calculated in this way, was at the rate of 1·24 per cent. in the first, and 1·35 in the last decenniad. It is evident that although by an infelicity which is now vanishing, the number of our Irish brethren in Ireland decreased, the number of persons of Irish origin increased.

4. Natural Increase.

The following tables show the relations between the births, deaths, emigrants, and population of the United Kingdom (*exclusive of the Islands in the British Seas, and the Army, Navy, and Merchant Seamen abroad*). It will be borne in mind that the registration of births is defective, and that in Ireland not only the births but the deaths are not all registered. There is also no account of returning emigrants or of immigrants into the several ports of the kingdom.

	Enumerated Population, 1861.	Registered Births, 1861–70.	Registered Deaths, 1861–70.	Emigration, 1861–70.	Population, 1871, estimated from the Excess of Births over Deaths in Ten Years 1861–70 less recorded Emigration.	Enumerated Population, 1871.	Difference between enumerated Population, 1871, and the Population estimated by the foregoing Method.
	Cols. 1	2	3	4	5	6	7
UNITED KINGDOM -	28,927,485	10,083,680	6,414,106	1,674,594	30,922,465	31,465,480	+ 543,015
England and Wales - -	20,066,224	7,499,527	4,794,714	649,742	22,121,295	22,704,108	+ 582,813
Scotland - -	3,062,294	1,121,321	705,530	158,226	3,319,859	3,358,613	+ 38,754
Ireland - - -	5,798,967	1,462,832*	913,862*	866,626	5,481,311	5,402,759	— 78,552

Note.—Assuming the registered numbers of Births and Deaths in the ten years 1861–70, and also the recorded numbers of Emigrants, to be correct, it follows that the Births in the ten years 1861–70, less the Deaths and Emigrants in the same period, added to the enumerated Population 1861, would equal the enumerated Population in 1871, less the number of Immigrants in the ten years. The figures in Col. 7, being the difference between the enumerated Population 1871 and the Population estimated by the first method, would represent the Immigration in the ten years 1861–70, of which no record exists, but for the defects in registration of Births and Deaths, and in the Records of Emigration.

* The Registration of Births and Deaths in Ireland commenced on 1st January 1864, and is believed to be more defective than the Registration of England and Wales. In order to make up the totals of births and deaths in the 10 years for that division of the United Kingdom it has been assumed that the birth and death-rates were the same there during the earlier years of the decade as during the later years.

Mean Enumerated Population, Annual Births and Deaths Registered, Birth-rate and Death-rate, 1861–1871.

	Mean Enumerated Population, 1861–1871.	Average Annual Births, 1861–1870.	Average Annual Deaths, 1861–1870.	Mean Annual Birth-rate per 1,000, 1861–1870.	Mean Annual Death-rate per 1,000, 1861–1870.
UNITED KINGDOM - -	30,196,483	1,008,368	641,411	33·39	21·24
England and Wales -	21,385,166	749,953	479,472	35·07	22·42
Scotland - - -	3,210,454	112,132	70,553	34·93	21·98
Ireland - - -	5,600,863	146,283	91,386	26·12	16·32

5. Estimates of Future Population; Periods of Doubling.

If a complete registration of births and deaths, of immigrants, and emigrants existed in the United Kingdom, it would be possible after one Census to follow the population year by year; still even in that case a Census is required at least decennially, for two reasons: (1) as a check equivalent to the taking the stock of a merchant, and (2) as a means of determining the population of each town and district growing partly by the excesses of immigration over emigration. But the emigration returns are only kept at ports where

there are officers for the purpose, and there is no return at all of immigrants, as the passport system has never been in use in England. There are no means of knowing how many foreigners or even of our fellow countrymen from Scotland or Ireland have entered England, nor how many Englishmen have gone to those parts of the United Kingdom or to other countries. The same observation applies to Ireland and to Scotland, to London, and every town and district. A decennial Census is therefore indispensable; and where the population is liable to great fluctuations, a quinquennial Census, such as is taken in France, is required. In Germany the Census is triennial.

In England it has been found for some time that we can calculate for the future on a steady increase of population, at a rate bearing a definite relation to the rates in previous decenniads. The rate was actually less between the ten years 1851–61 than it had been between the previous ten years 1841–51, and now again it has risen to 1·24 per cent. per annum or 13 per cent. in ten years. Should this rate continue the population will double itself in 56 years.

The United Kingdom has increased at a slower rate, but the annual rate was more rapid in the last than it had been in the previous ten years; it was between 1861–71 at the rate of ·828 per cent. or 8·28 per 1,000 per annum. At this rate the population of the United Kingdom would double itself in 84 years.

Here it is assumed that the population increases at the same rate in geometrical progression through a series of years; and if this rate were invariable the population at any future moment could be calculated by a simple formula, as precisely as the position of a planet or a comet in the heavens. But, even if the law of increase in man were as well established as the law of gravitation in the universe, the problem of the future growth of our race involves too many elements to admit of any definite solution. Still we are justified in reasoning on this subject from experience; and as a great nation cannot live merely for the day, it is by necessity driven to forecast in order to provide for the future. That experience warrants us in assuming that the population will increase pretty uniformly for some years to come.

A large addition to the population of the kingdom will, it is believed, be hailed generally with satisfaction by the country, as its policy has been practically a policy of progress in numbers; and we shall venture to state very briefly the reasons which appear to confirm the soundness of the popular opinion, in opposition to those who hold that increase of population is in itself an evil.

Not so, ever taught the Anglican clergy. Celibacy was exalted in England in the age of monasticism; but marriage, far from being discouraged by the English Church, has since the Reformation been promoted by its services. The true doctrine with its due limitations was luminously defined by one of her most eloquent prelates in the seventeenth century; "Marriage," he says, "is the mother of the world, and preserves kingdoms, "and fills cities, and churches, and heaven itself. Celibate, like the fly in the heart of "an apple, dwells in a perpetual sweetness, but sits alone, and is confined, and dies in "singularity; but marriage, like the useful bee, * * *" † And in the spirit of this doctrine the English clergy have enforced the text "increase, multiply, and replenish "the earth," both by precept and example, especially by example. The Catholic clergy have even been rashly accused of promoting marriage and multiplication in the sister kingdom of Ireland. No religious sect in this kingdom among the many, however eccentric, advances claims to sanctity on the grounds of asceticism: some have erred in the other direction. Milton and the poets have written in the same sense.

6. Laws of Population.

Euler, on mathematical considerations, had shown how rapidly men can multiply, and how it is quite possible that the millions of the population of the earth might have sprung from one pair; and economic writers had dwelt on the connexion between population and subsistence; but to Malthus belongs the merit of having established, by an elaborate statistical induction, the law that population grows naturally at rates in geometrical progression. This principle deserves to be held as a discovery. The great Naturalist of the age recognizes the generality of the law, and, extending it to the whole organic kingdom, bases mainly on the resulting struggle for existence his doctrine of the development of the infinite variety of forms of living nature. It applies to nations. A very different use was immediately made of the doctrine by Malthus and his followers: they ascribed—as if *that* problem were so simple—the misery of mankind to this propensity to multiply in numbers beyond all bounds; and in fact it is very easy to prove that

† Jeremy Taylor, Sermon on Marriage Ring.

even by doubling slowly, not only subsistence will be outstripped, but that this earth, nay, the whole solar system, in the end will be covered by human beings, or by any other beings increasing by the same law. The absurdity of the reduction is sufficient to show that the law has evident limitations, and that true policy consists in establishing a just balance between the multiplying force and existing obstacles in England.

Its fruitfulness leads to incidental evils, but without this exhaustless store of recuperative energy the English race would now have no existence. It could not have survived the dangers and disasters of its infancy. It could never out of a handful of wandering Celts or a few shiploads of Angles and Saxons have grown into a great power: it could never have established in its cities all the industrial arts; it could never have peopled a portion of the North American continent; it could never have covered the seas with its ships, and brought all the world into intercourse by commerce; it could never have shed over the ages the light of its civilization, discoveries, inventions, arts, and literature.

The population of the United Kingdom in the middle of the year 1801, when the first Census of Great Britain was taken, amounted to about 16,302,410. There was a scarcity, approaching famine, in the preceding year, and the mortality was high; population was even then pressing upon subsistence, and this policy of restraint of population would of course have led rather to reduction than to increase of numbers to be fed. The people adopted a different policy; and in 1871 the pressure on subsistence is less than it was in 1801; the numbers enumerated are 31,817,108; they are increasing still, and the products they create increase faster than their numbers. The mighty ship is now freighted with a cargo of infinite worth; it is driven by complex and potent mechanism; its consumption of force is enormous; and it carries millions instead of thousands of souls; but in the hands of the "Lords "and Commons of England, who consider what nation it is whereof they are, and "whereof they are the governors," she still holds on her course as hitherto under the favour of Heaven.*

The rate of increase of population directly depends on two other rates, the birth-rate and the rate of mortality; it is the difference between these two rates, both of which are under such a degree of control as enables educated nations either to augment or to diminish their numbers. Thus in a kingdom where to 1,000 living 35 are born, 22 die annually, the rate of natural increase is 13, and the birth-rate remaining constant, this rate of increase varies as the rate of mortality rises above or falls below 22; so if the rate of mortality remain constant, the rate of increase varies as the birth-rate rises above or falls below 35. The process either way is accelerated or retarded according as these rates operate in the same or in opposite directions. The birth-rate is necessarily limited by human fertility, but there is no limit to which it cannot be reduced; upon the other hand the death-rate cannot be diminished below a certain figure, but it may be raised to an indefinite extent. So by the play of these inlets and outlets of life there are several ways in which races of men are extinguished; and thousands of races have been extinguished; not only petty savage tribes, but the peoples of mighty empires; while no nation known has increased as rapidly as capital increases at a low rate of interest.

Large numbers of every population at marriageable ages remain unmarried, and many couples apparently in sound health in every respect bear no children, yet the increase of population in geometrical progression is maintained nearly all over Europe; still without any increase in the rate of mortality the birth-rate has at least in one nation been so diminished as to check population not by the restraint from marriage which Malthus called "moral restraint," but by restraint of some other kind to which the qualifying adjective scarcely applies. In France the marriages have been kept up, but the average births to a marriage have been now reduced to 3·1; the birth-rate in the last return (1853–68) is 26·35, which only exceeded the death-rate, 23·72, by 2·63 per 1,000. The natural annual increase was barely 0·26 per cent. In England the children born in wedlock to a marriage are 4·3, the birth-rate is sustained at 35, and the mortality rate is 23 per 1,000.

A healthy nation sends out annual swarms of emigrants, and their number in the actual state of the world regulates naturally the population of the country of their birth.

The population of the United Kingdom is still increasing at the natural rate of 1,173 a day; of whom 705 swell the population at home, 468 emigrate. In the last 20 years the nation has strengthened itself by adding four millions to its

---

* We may venture in 1871 to quote the passage written by Milton in 1644 as applicable to these as it was to those times:— "Lords and Commons of England, consider what nation it is whereof ye are, and whereof ye are the governors; a nation not slow "and dull, but of a quick, ingenious, and piercing spirit; acute to invent, subtile and sinewy to discourse, not beneath the reach "of any point the highest that human capacity can soar to * * * Yet that which is above all this, the favour and the love of "Heaven, we have great argument to think in a peculiar manner propitious and propending to us."—*Areopagitica*.

numbers, and in the same time has sent out almost as many more millions to the British colonies and to the United States of British origin, where they are multiplying as rapidly as they did at home. That is still the policy of the English race, and it appears to succeed. Man creates the materials of his life; and the millions of acres of fertile land in the new world call for hands to gather the varied harvests they yield to modern industry. Grain is brought to our shores, where it is sold with a profit, from countries so remote as California and Australia, by the skill and enterprize of commerce; meat and animal products will no doubt in the end be, by the aid of chemistry, brought to England from the other hemisphere, as they are brought now from the distant countries of Europe. A glance at the annexed tables, which we have been able to add by the courtesy of the Statistical Department of the Board of Trade, will show how much the quantities of food of every kind imported into the United Kingdom have increased since the last Census was taken. And not only has the quantity of food been imported to an increased extent but the various staples of industry, especially wool and metals.

The working power of the country has been increased, since the Census of 1861 was taken, to an incredible extent by the machines, tools, and engines which the ingenuity of Whitworth, Armstrong, and other able men have placed in the hands of masters of matchless energy and workmen of great aptitude. Railways and telegraphs have increased the efficiency of all the forces of which the population disposes.

The prodigious mechanical and chemical powers at work in the steam engines and furnaces is significantly expressed by the coal produced annually, which in ten years 1858–60 to 1867–9 rose from 72,343,704 tons to 105,023,065 tons. The explosive forces under control have also been multiplied; and the iron ships, torpedoes, guns, and arms of prime excellence have increased the means of defending the wealth, credit, and life of the nation, now consisting of thirty-two millions. The increase of ships of every description, and of men to be trained to man them, is growing every year of more importance; for as these islands, populous as great cities in comparison with their territory, will every year require in proportion more of their food, and of the raw materials of industry from abroad, it is England's duty not only to hold good, as she can well do, her first line of encircling naval defences but her maritime power on the seas, of which, when her population was smaller than it is now, her dauntless mariners won the dominion.

X. CONCLUSION.

The Census Returns of the United Kingdom show that during her happy reign 5,900,000 have been added to Her Majesty Queen Victoria's subjects, not by the seizure of neighbouring territories, but mainly by the enterprise, industry, and virtue of her people.

How the population of the kingdom is upheld; how this marvellous society is organized; how the people are distributed over every place; what houses they dwell in; what numbers of either sex, of children, of men and women are living married, single, widowed at the several ages; what are their relations to heads of families; what occupations men and women of the several ages follow; what numbers living in the several places were born in the same or in other parishes, counties, and countries; and what numbers of the two sexes were labouring under infirmities of the chief senses or of the mind in every locality, remains for further analysis: and this analysis will require time, as it deals with millions of facts and persons; when completed, all the data will contribute to the self-knowledge of the nation. Mere numbers are elements of force; and a prolific must, in the end, beat a sterilized people; but this element of quantity is second in importance to the qualities of the race; for an intelligent, vigorous, and healthy nation, well organized, is alone worthy of continuous existence.

Since the returns arrived at the Census Office an important use has been made of them in extracting information required by School Boards established under the Elementary Education Act of 1870. The London School Board has already been supplied with details relating to nearly 700,000 children between the ages of 3 and 13 living within the limits of the School Board District, the information thus obtained being used as a basis of the further inquiries now proceeding in order to ascertain the educational wants of various localities in the metropolis. Similar details will be furnished for the use of the School Boards in other parts of the country.

This preliminary report, it must be borne in mind, presents only the unrevised figures, and the short interval that has elapsed since they reached us has allowed little time for presenting their results in a fashion commensurate with their importance or worthy of the subject. But we have thought it right to append a few calculations accompanied by explanatory remarks, in the hope that they may save trouble and be of some use to those who consult the Tables.

We have the honour to be,

Sir,

Your obedient and faithful Servants,

GEORGE GRAHAM, Registrar General.
WILLIAM FARR.
JAMES THOMAS HAMMICK.

WILLIAM CLODE, Secretary.

108643

APPENDIX.

The Census of the principal Australian Colonies was taken simultaneously with that of England in April 1871. The official returns of the results of the Census of those Colonies, of the North American Colonies, and of the other Colonies and Dependencies of the Empire, will be given in our subsequent report.

Mr. F. A. Walker, the Superintendent of the Census of the United States, has obligingly communicated the results of the enumeration of the population of that kindred nation for 1870 so far as they had been ascertained up to the 27th May. Returns covering from twenty to twenty-five thousand of the population had still to be received at that date.

The total population of the United States (except as above mentioned) is 38,546,699, whose origin and race are thus distinguished :

Native	32,976,758
Foreign	5,569,941
White	33,568,681

Indians	25,506
Chinese	63,178
Others	141

The aggregate numbers of British origin born in the United States cannot be fully known until the Returns from New York, Mississipi, Ohio, Pennsylvania, and Texas have been received; the other States and Territories have returned 327,735 Englishmen, 985,432 Irishmen, 86,535 Scotchmen, and 25,180 Welshmen among their population.

It may be interesting to contrast this statement with Sir John Lubbock's estimate of the Indian population of the American territories. The facts throw some light on the theory of population in its relation to the land :

" Schoolcraft tells us* that excluding Michigan territory, west of Lake Michigan, and north of Illinois, there were in the United States in 1825 about 97,000 Indians, occupying 77,000,000 of acres, or 120,312 square miles [this is nearly the area of the United Kingdom]. This gives one inhabitant to every $1\frac{1}{4}$ square miles. In this case, however, the Indians lived partly on the subsidies granted them by Government in exchange for land, and the population was therefore greater than would have been the case if they had lived entirely on the produce of the chase. The same reason affects, though to a smaller extent, the Indians in the Hudson's Bay Territory. These tribes were estimated by Sir George Simpson, late Governor of the territories belonging to the Hudson's Bay Company, in his evidence given before the Committee of the House of Commons in 1857, at 139,000, and the extent is supposed to be more than 1,400,000 square miles, to which we must add 13,000 more for Vancouver's Island, making a total of more than 900,000,000 of acres, about 6,500 acres or 10 square miles to each individual. Again, the inhabitants of Patagonia, south of 40°, and exclusive of Chiloe and Tierra del Fuego, are estimated by Admiral Fitzroy at less than 4,000, and the number of acres is 176,640,000, giving more than 44,000 acres or 68 square miles for each person.

A writer in the " Voice of Pity," however, thinks that their numbers may perhaps amount to 14,000 or 15,000.† It would be difficult to form any Census of the aborigines in Australia. Mr. Oldfield estimates that there is one native to every 50 square miles,‡ and it is at least evident that since the introduction of civilization the total population of that continent has greatly increased.

Indeed, population invariably increases with civilization. Paraguay, with 100,000 square miles, has from 300,000 to 500,000 inhabitants, or about four to a square mile. The uncivilized parts of Mexico contained 374,000 inhabitants in 675,000 square miles, while Mexico Proper, with 833,600 square miles, had 6,691,000 inhabitants. Naples had more than 183 inhabitants to each square mile; Venetia more than 200 ; Lombardy 280 ; England 280 ; Belgium as many as 320.

Finally, we cannot but observe that under civilization the means of subsistence have increased even more rapidly than the population. Far from suffering for want of food, the more densely peopled countries are exactly those in which it is, not only absolutely, but even relatively, most abundant. [" *Pre-Historic Times," by Sir John Lubbock, M.P., F.R.S., pp.* 482–3.]

1871, April 3rd - - -	4,259,032	260,178	37,807	22,704,108	11,040,403	11,663,705

* The Army, Royal Navy, and Merchant Seamen are not included in the above numbers for the years prior to 1841. The Military at home were for the first time returned with the general population in 1841; and persons on board vessels of the Royal Navy and Merchant Service in the harbours, creeks, and rivers of England and Wales were included, as well as the Military at home, in 1851, 1861 and 1871. The numbers for 1871 include also the crews of home trade vessels and of fishing boats out at sea on the night of April 2nd, returned as belonging to English and Welsh ports.

TABLE IV.—INCREASE of INHABITED HOUSES and of POPULATION Enumerated in **England and Wales**, between each of the Enumerations from 1801 to **1871**.

INTERVAL BETWEEN THE ENUMERATIONS.	INCREASE OF INHABITED HOUSES.	INCREASE OF POPULATION.	DECENNIAL RATE OF INCREASE PER CENT. OF POPULATION.
1801—1811 = 10·21 years - -	221,581	1,271,720	14
1811—1821 = 10· „ - -	290,652	1,835,980	18
1821—1831 = 10· „ - -	393,388	1,896,561	16
1831—1841 = 10·02 „ - -	462,401	2,017,351	14*
1841—1851 = 9·81 „ - -	334,094	2,013,461	13*
1851—1861 = 10·02 „ - -	461,466	2,138,615	12
1861—1871 = 9·99 „ - -	519,527	2,637,884	13
Increase in 70 years -	2,683,109	13,811,572	Total increase per cent. in 70 years - - 155 Annual increase per cent. - - - 1·348

* In computing the *rate of increase* between 1831 and 1841, the Military returned in the latter year are left out of the account; so also in computing the rate of increase between 1841 and 1851, the Seamen and others on board vessels returned in 1851 are excluded.

TABLE VII.—Houses and Population in **LONDON**, as defined for various purposes, in 1861 and **1871.**

	1861.		1871.	
	Inhabited Houses.	Population.	Inhabited Houses.	Population.
London within the Registrar General's Tables of Mortality. (*See Table X.—Districts 1 to 28.*) - - -	359,421	2,803,989	417,348	3,251,804
London within the Limits of the Metropolis Local Management Act - - - - - - - - -	360,065	2,808,862	419,222	3,264,530
London School Board District - - - - - -	360,089	2,809,004	419,303	3,265,005
Metropolitan and City of London Police Districts -	434,530	3,222,720	528,034	3,883,092
Metropolitan Parliamentary Boroughs - - -	334,318	2,640,253	380,295	3,008,101
City of London within Municipal and Parliamentary limits	13,298	112,063	9,321	74,732*

* The Corporation of the City of London in 1866 took as it was termed a "Day-Census" of the City and Liberties, and found that, in addition to the ordinary sleeping population, the mercantile and commercial population engaged in the City daily amounted to 170,133. The number has probably increased since that date, but taking it at 170,133 in 1871, that in addition to the numbers enumerated (74,732) will make the Day Population 244,865.

TABLE VII *a.*—Houses and Population in 1861 and **1871** within the limits of the "**Metropolis Local Management Act,**" 19 Vict. c. 20.

	360,089	2,809,004	419,303	3,265,005

* Including the hamlets of Penge and Mottingham.

TABLE VII *c*.—Houses and Population in 1861 and **1871** within the Limits of the **London Police Districts.**

POLICE DISTRICTS.	1861.		1871.	
	Inhabited Houses.	Population.	Inhabited Houses.	Population.
Metropolitan Police District*	421,232	3,110,657	518,713	3,808,360
City of London Police District	13,298	112,063	9,321	74,732
	434,530	3,222,720	528,034	3,883,092
The "Metropolitan Police District"* includes :—				
All the parishes and places within the limits of "London" (exclusive of the City of London)	346,123	2,691,926	408,027	3,177,072
Additional parishes :—				
In Middlesex	31,853	175,671	44,325	253,210
In Surrey	19,223	109,984	30,744	177,484
In Kent	5,837	31,005	9,037	49,089
In Essex	14,521	83,444	21,858	127,831
In Herts	3,675	18,627	4,722	23,674

* The Metropolitan Police District extends over the whole of Middlesex (exclusive of the City of London) and the surrounding parishes in the counties of Surrey, Kent, Essex, and Hertford, of which any part is within 12 miles from Charing Cross, and those also of which any part is not more than 15 miles in a straight line from Charing Cross. The area of the district is 439,770 statute acres, equal to 687 square miles. The City of London, in the midst of the district, is 1·13 square miles, and including this the police area is represented by a square of 26·24 miles to the side.

TABLE VII *d*.—Houses and Population in 1861 and **1871** within the **Ten Metropolitan Parliamentary Boroughs.**

PARLIAMENTARY BOROUGHS.	1861.		1871.	
	Inhabited Houses.	Population.	Inhabited Houses.	Population.
London City	13,298	112,063	9,321	74,732
Westminster	26,286	254,623	25,478	246,413
Chelsea*	24,565 ?	174,280 ?	34,769	258,011
Marylebone	47,896	436,252	52,239	477,555
Hackney*	44,155	311,152	49,410	362,427
Finsbury	44,410	387,278	49,928	443,316
Tower Hamlets	44,155	336,693	51,322	391,568
Lambeth	44,529	294,883	54,900	379,112
Southwark	25,659	193,593	26,941	207,335
Greenwich	19,365	139,436	25,987	167,632
	334,318	2,640,253	380,295	3,008,101

* Chelsea was not a borough until 1867, and the Borough of Hackney was comprised in the Tower Hamlets until the same year.

TABLE VIII.—Houses and Population in the **Cities** and **Boroughs** having defined Municipal or Parliamentary limits, 1861 and **1871.**

*** These Statements of the Number of Houses and Population in the principal Cities and Boroughs have been furnished generally by the Superintendent Registrars, and refer to the *Parliamentary or Municipal limits*, or to both where co-extensive, as denoted by the letters placed after the names of places; viz., M., Municipal limits; P., Parliamentary limits; M. & P., Municipal and Parliamentary limits (co-extensive).

Boroughs whose Parliamentary limits were extended by the Act 31 and 32 Vict. c. 86. are marked (*e*); New Parliamentary Boroughs which were created by the Act 30 and 31 Vict. c. 102. are marked (*n*); Municipal Boroughs which have been incorporated since last Census are marked (*i*); Municipal Boroughs whose limits have been altered are marked (*a*).

The numbers of seamen and others on board vessels in the ports, as ascertained by the officers of Her Majesty's Customs, have been added to the general population.

N.B.—*Towns not being either corporate under the Municipal Reform Act, nor sending members to Parliament, do not appear in the Table.*

* The minus sign (—) prefixed to any of the numbers in this column, indicates that the population *decreased* between 1861 and 1871 to the extent stated. It must be borne in mind in reading this column that as regards all cities and boroughs whose designations (M. or P.) are followed by an italic letter within brackets, the increase of their population is partly due to the extension of their areas.

* In the modern sub-division of England and Wales into Registration Districts for purposes connected with the registration of Births, Deaths, and Marriages, attention has been paid to circumstances of local convenience, and to the present distribution of the people, rather than to the ancient boundaries of counties and hundreds. Hence the groups of entire Registration Districts (or Poor Law Unions) do not coincide with the actual limits of the several counties, although in aggregate area and population they in most cases closely approximate.

The following Tables X. and XI. exhibit the Registration Districts and Sub-Districts, arranged according to their topographical connection, as in the reports of the Registrar General.

† Wherever the minus sign (—) is prefixed to the numbers given in the column headed throughout these Tables (IX., X., and XI.) "Excess of Births over Deaths" it denotes that the births in the District or Sub-District, instead of exceeding the deaths were, in fact, less *than the Deaths* to the extent stated.

ENGLAND AND WALES.

NOTE.—The Superintendent Registrars' Districts are for the most part co-extensive with POOR LAW UNIONS or Single Parishes under Boards of Guardians, or with Parishes in which the relief of the poor is administered under Local Acts. Where this is not the case, the Districts are thus distinguished:—* *two or more* Unions or Single Parishes with Boards of Guardians; ✢ Poor Law Unions with Places, not under the Poor Law Amendment Act, annexed for Registration purposes; † Single Parishes or Incorporations of Parishes under *Local Acts*; § Parishes still under the Act of 43d Eliz. The population of Unions, &c., where stated in the notes, refers to the Census of 1871.

(a) The Superintendent Registrar's District of Kensington is composed of Kensington Parish (pop. 120,234 in 1871), the Fulham Union (pop. 66,070 in 1871), and Paddington Parish (pop. 96,784 in 1871).
(b) Strand Union and the Middle Temple.
(c) The Holborn Union, Gray's Inn, the Charterhouse, and Lincoln's Inn.
(d) London City Union and the Inner Temple. The *Deaths* in the years 1861-70 exceeded the *Births* by 644, as denoted by the minus sign (–). St. Bartholomew's Hospital is in this District.

Note.—The Registration Sub-districts are sub-divisions of the *Districts*, and they embrace the parishes, parts of parishes, or places, assigned to each Registrar of Births and Deaths. The letters W H L placed against the name of a Sub-district, indicate that it contains within its limits a Workhouse (W), Hospital (H), or Lunatic Asylum (L), as the case may be.

TABLE XI. (*continued.*)—INHABITED HOUSES and POPULATION in **Registration Sub-Districts** on April 8th, 1861, and on April 3rd, **1871.**

	REGISTRATION SUB-DISTRICTS.	INHABITED HOUSES.		POPULATION ENUMERATED.		Increase or Decrease in the Number of PERSONS between 1861 and 1871.		Excess of registered Births over registered Deaths in the Ten Years 1861–70.
		1861.	**1871.**	1861.	**1871.**	Increase.	Decrease.

EMIGRATION.

TABLE XIV.—NUMBER of **Emigrants** from the UNITED KINGDOM during the Ten Years 1861 to 1870, from Returns furnished by Her Majesty's Emigration Commissioners.

YEAR.	Total Number of Emigrants.	English.	Scotch.	Irish.	Foreigners.	Not distinguished.
1861 -	91,770	22,145	6,730	36,322	3,619	22,954
1862 -	121,214	35,487	12,598	49,678	3,311	20,140
1863 -	223,758	61,243	15,230	116,391	7,833	23,061
1864 -	208,900	56,618	15,035	115,428	16,942	4,877
1865 -	209,801	61,345	12,870	100,676	28,619	6,291
1866 -	204,882	58,856	12,307	98,890	26,691	8,138
1867 -	195,953	55,494	12,866	88,622	31,193	7,778
1868 -	196,325	58,268	14,954	64,965	51,956	6,182
1869 -	258,027	90,416	22,559	73,325	65,752	5,975
1870 -	256,940	105,293	22,935	74,283	48,396	6,033
TOTAL -	1,967,570	605,165	148,084	818,580	284,312	111,429

NOTE.—It appears from the above Table that 1,967,570 Emigrants sailed from the Ports of the United Kingdom at which there are Government Emigration Officers, during the ten years 1861–70. But in order to judge more accurately of the extent to which Emigration has affected the Population, the following Table has been prepared, showing the number of Emigrants in the interval between the Censuses of 1861 and 1871; the Emigrants whose origin was not distinguished in the Returns have been distributed as to origin in the proportions of those whose birth-places were ascertained :—

NUMBER and ORIGIN of EMIGRANTS from the UNITED KINGDOM between the Censuses of 1861 and 1871.

YEARS.	Total.	English.	Scotch.	Irish.	Foreigners.
Total - - -	1,976,577	649,742	158,226	866,626	301,983
1861 (April 8th to Dec. 31st)	73,036	24,502	8,020	36,778	3,736
1862–70 - - - - -	1,875,800	611,880	148,351	820,981	294,588
1871 (to March 31st) -	27,741	13,360	1,855	8,867	3,659

It may be inferred from the official returns that the number of Emigrants from the United Kingdom was not less than—

717,913 in the interval of the Censuses 1831 and 1841 ;
1,692,063 ditto ditto 1841 and 1851 ;
2,249,355 ditto ditto 1851 and 1861 ;
1,976,577 ditto ditto 1861 and 1871.

The following is a comparison of the number of Emigrants of British and Foreign Extraction during each of the intervals between the three last Censuses :—

	Total.	English.	Scotch.	Irish.	Foreigners.
1851 (April 1st) to 1861 (April 7th) -	2,249,355	640,316	182,954	1,231,308	194,777
1861 (April 8th) to 1871 (March 31st) -	1,976,577	649,742	158,226	866,626	301,983

ALPHABETICAL INDEX

TO

Districts, Sub-Districts, Boroughs, and **Towns** referred to in preceding Tables.

NOTE.—The names of Registration Districts are printed in Capitals, of Sub-Districts in ordinary type, and of Boroughs or Towns in *italics*. The numbers printed within brackets after the names of places are the reference numbers of the Registration Districts and Sub-Districts according to the topographical arrangement adopted in the Registrar General's Reports.

In this alphabetical arrangement the principle is adopted of putting places having *compound names* in the order indicated by the usual pronunciation of those names; thus, East Grinstead will be found under the letter E, and not under G as "Grinstead, East;" St. James under the letter S, and not as "James, St.;" High Longtown under the letter "H" and not as "Longtown, High."

SUPPLEMENTARY ESTIMATE

FOR

CIVIL SERVICES.

CLASS I.

— 24. —

PORTLAND HARBOUR.

I.—SUPPLEMENTARY ESTIMATE of the Amount required in the Year ending 31st March 1871, on account of the Expense of Constructing PORTLAND HARBOUR.

Five Thousand Eight Hundred Pounds.

II.—HEAD under which this Vote will be accounted for by the ADMIRALTY.

	£.
PORTLAND HARBOUR - - - - - - - - - - - -	5,800

This additional sum is required to meet the exceptional and extensive renewals of the plant used by the convicts in the quarries during the year, and absolutely required by the convict authorities; to cover the cost of providing the additional material found to be essentially necessary to complete the deposits for the protection of the Breakwater; to provide for sums obtained for works executed, and plant supplied, to other Departments of Government (Naval, Military, and Convict), estimated as a Credit in aid of the Vote, but subsequently decided to be carried into the Exchequer as Extra Receipts; and, lastly, for the continuance of the current expenses of the Work up to its completion, formerly taken to 31st December 1870, but now estimated to 31st March 1871.

Note.—The estimated amount of Extra Receipts relating to this Vote, to be paid into the Exchequer during the year 1870-71, is 7,200 *l.*

— 27 A. —

PUBLIC RECORD REPOSITORY.—ACQUISITION OF LANDS.

I.—SUPPLEMENTARY ESTIMATE of the Amount required in the Year ending 31st March 1871, for the Purchase of Premises and Land adjoining the PUBLIC RECORD REPOSITORY.

Nine Thousand Five Hundred Pounds.

II.—HEAD under which this Vote will be accounted for by the COMMISSIONERS of HER MAJESTY'S WORKS, &c.

	£.
A.—PUBLIC RECORD REPOSITORY:	
Acquisition of Lands - - - - - - - - - - -	9,500

Note.— The property included in the above Estimate consists of a blacksmith's shop, and certain adjoining premises adjacent to the Public Record Office, the acquisition of which has been deemed necessary for the security of the building from fire.

CLASS I.—*continued.*

— 32. —

BRITISH CONSULATE AND EMBASSY HOUSES, CONSTANTINOPLE CHINA, JAPAN, AND TEHRAN.

I.—SUPPLEMENTARY ESTIMATE of the Amount required in the Year ending 31st March 1871, for the BRITISH EMBASSY HOUSES, CHAPEL, CONSULAR OFFICES, &c., at *Constantinople, China, Japan,* and *Tehran.*

£.	585	–	–

* These salaries are paid to Officers, &c. of the National Debt Office who are employed upon the business connected with Commutation of Pensions. The amount inserted provides for their remuneration from the date of commencement of the operation of the Act to 31st March 1871.

CLASS II.—*continued.*

— 27. —

OFFICE OF WORKS AND PUBLIC BUILDINGS.

I.—SUPPLEMENTARY ESTIMATE of the Amount required in the Year ending 31st March 1871, to pay the Salaries and Expenses of the OFFICE of the COMMISSIONERS of HER MAJESTY'S WORKS and PUBLIC BUILDINGS.

Three Thousand Three Hundred and Fifty Pounds.

II.—SUB-HEADS under which this Vote will be accounted for by the COMMISSIONERS of HER MAJESTY'S WORKS.

	£.	£.
A.—SALARIES		2,050
D.—INCIDENTAL EXPENSES (LEGAL BRANCH)		1,300
	£.	3,350

III.—DETAILS of the above.

	£.
A.—SALARIES:	
For Permanent and Temporary Additions to the Staff of the Office rendered necessary by the transfer to the Department of the business connected with the Chancery, Bankruptcy, and County Court Buildings, the Surveys of the United Kingdom, and the Science and Art Department and British Museum Buildings	2,050
D.—INCIDENTAL EXPENSES (LEGAL BRANCH):	
For Fees to Counsel, Law Stationers' Charges, Travelling, Postage, &c.	1,300*

* This amount is required to provide for the expenses consequent on the necessity for acquiring during the present year the remaining properties scheduled under the Public Offices Site, National Gallery Enlargement, and Houses of Parliament Acts.

— 39. —

POOR LAW COMMISSION, IRELAND.

I.—SUPPLEMENTARY ESTIMATE of the Amount required in the Year ending 31st March 1871, to pay the Expenses connected with the ADMINISTRATION of the LAWS relating to the POOR in *Ireland*.

Three Thousand and Twenty-six Pounds.

II.—SUB HEADS under which the above Sum will be accounted for by the POOR LAW COMMISSION, *Ireland*.

	£.	£.
C.—SALARIES OF SCHOOLMASTERS AND SCHOOLMISTRESSES IN WORKHOUSES		650
D.—SALARIES OF MEDICAL OFFICERS, MEDICINES, &c.		2,376
	£.	3,026

III.—DETAILS of the above.

	£.
C.—Salaries of Schoolmasters and Schoolmistresses for the half-year ended 29th September 1870 in 17 Unions	650
D.—One half of Salaries of Medical Officers of Workhouses and Dispensary Districts, and one half of cost of Medicines and Medical and Surgical Appliances in 17 Unions	2,376

Note.—The insufficiency of the Grant arises from the Payment, in the current year, to certain Unions of Educational and Medical Expenses of 1868-9, and also from a small under-estimate.

CLASS III.

— 1. —

LAW CHARGES.

I.—SUPPLEMENTARY ESTIMATE of the Amount required in the Year ending 31st March 1871, to defray LAW CHARGES, and the Salaries, Allowances, and Incidental Expenses, including Prosecutions relating to the Coin, in the Department of the SOLICITOR for the Affairs of HER MAJESTY'S TREASURY.

Four Thousand Pounds.

II.—SUB-HEAD under which this Vote will be accounted for by the SOLICITOR to the TREASURY.

	£.
D.—COST OF PROSECUTIONS, FEES TO COUNSEL, &c. - - - - - - - -	4,000

The above amount is mainly required in consequence of the heavy expenditure in connection with the Prosecutions for Bribery arising out of the Elections at Norwich, Beverley, and Bridgwater.

— 5. —

LONDON BANKRUPTCY COURT.

I.—SUPPLEMENTARY ESTIMATE of the Amount required in the Year ending 31st March 1871, to pay the Expenses of the LONDON BANKRUPTCY COURT.

Four Thousand Eight Hundred Pounds.

II.—SUB-HEAD under which this Vote will be accounted for by the ACCOUNTANT in BANKRUPTCY.

CHIEF COURT.	£.
C.—A.—COSTS OF PROSECUTION- - - - - - - - - - - - - -	4,800

This Supplementary Estimate is rendered necessary to provide for Costs of Prosecution of Bankrupts, under 23 & 24 Vict. c. 134, ss. 221. 223, and 32 & 33 Vict. c. 91, s. 13.

CLASS III.—*continued.*

— 16. —

MISCELLANEOUS LEGAL CHARGES, ENGLAND.

I.—SUPPLEMENTARY ESTIMATE of the Amount required in the Year ending 31st March 1871, to defray the Expense of MISCELLANEOUS LEGAL CHARGES in *England*.

Two Thousand Five Hundred Pounds.

II.—SUB-HEAD under which this Vote will be accounted for by the TREASURY

	£.
A.—REVISING BARRISTERS - - - - - - - - - - - - - - -	2,500

The above Sum is required to meet Payments on account of Additional Barristers appointed by the Judges under Section 29 of 6 Vict. c. 18.

— 21. —

LAW CHARGES AND CRIMINAL PROSECUTIONS, IRELAND.

I.—SUPPLEMENTARY ESTIMATE of the Amount required in the Year ending 31st March 1871, to defray the Expenses of CRIMINAL and other LAW CHARGES in *Ireland*.

Eleven Thousand Pounds.

II.—SUB-HEAD under which this Vote will be accounted for by the CHIEF SECRETARY for IRELAND.

PROSECUTIONS.	£.
D.—PROSECUTORS AND WITNESSES AND GENERAL LAW EXPENSES - - -	11,000

This additional sum is required to meet the current year's expenditure, which it is anticipated will exceed the sum provided last Session, for the year 1870-71, by the amount above-mentioned.

CLASS IV.

— 4. —

NATIONAL GALLERY.

I.—SUPPLEMENTARY ESTIMATE of the Amount required in the Year ending 31st March 1871, to Pay the Salaries and Expenses of the NATIONAL GALLERY.

Seventy-five Thousand Pounds.

II.—SUB-HEAD under which this Vote will be accounted for by the Trustees of the NATIONAL GALLERY.

	£.
D.—PURCHASE OF PICTURES, &c. - - - - - - - - - -	75,000

This amount is required for the purchase of Pictures collected by the late Sir R. Peel.

CLASS V.

— 5. —

COMMISSIONS FOR SUPPRESSION OF THE SLAVE TRADE.

I.—SUPPLEMENTARY ESTIMATE of the Amount required in the Year ending 31st March 1871, for payment of the Salaries and Contingent Expenses of the MIXED COMMISSIONS established under Treaties with Foreign Powers for Suppressing the TRAFFIC in SLAVES, and in pursuance of Acts of the Legislature for carrying those Treaties into effect.

One Thousand Four Hundred and Sixty-seven Pounds.

II.—SUB-HEADS under which this Vote will be accounted for by the FOREIGN OFFICE.

	£.
A.—SALARIES - - - - - - - - - - - - - -	1,199

— 6. —

COMPENSATION TO SUFFERERS BY FIRE AT PERA.

I.—ESTIMATE of the AMOUNT required, in the Year ending 31st March 1871, for Grants by way of Compensation to the Sufferers by the FIRE at *Pera*, on the 5th June 1870.

Six Thousand and Thirty-one Pounds.

II.—SUB-HEADS under which this Vote will be accounted for by the TREASURY.

	£.
A.—COMPENSATIONS TO OFFICERS OF THE EMBASSY AND CONSULATE - -	5,281
B.—COMPENSATIONS TO OTHER SUFFERERS (BRITISH SUBJECTS) - - - -	750
£.	6,031

The above sum is required to meet payments which have been made from Civil Contingencies, in respect of the above service.

— 7. —

COMPENSATION TO OWNERS OF "LA HAVE."

I.—ESTIMATE of the Amount required, in the Year ending 31st March 1871, for Compensation paid to the Owners of the Ship "LA HAVE," in respect of the Seizure at *Jamaica* of the Cargo of this Vessel.

Eight Thousand and Thirty Pounds.

II.—HEAD under which this Vote will be accounted for by the TREASURY.

	£.	s.	d.
A.—COMPENSATION TO OWNERS OF "LA HAVE" - - - - - - - - -	8,030	–	–

The cargo of the "La Have" was ordered by the Governor of Jamaica, on the advice of his Attorney General, to be seized, on the ground that the Cargo had become forfeited under the Imperial Act 16 & 17 Vict. c. 107, s. 159, as applied to Jamaica by the Colonial Act 17 Vict. c. 2, s. 12. The Law Officers of the Crown in England and the Vice-Admiralty and Supreme Courts in Jamaica having pronounced against the Seizure, a compromise for the above Amount and restoration of the Cargo was effected.

CLASS VII.—*continued.*

— 8. —

RELIEF OF PARIS.

I.—ESTIMATE of the Amount required in the Year ending 31st March 1871, to replace Stores Supplied from Naval Yards, in Aid of the RELIEF of PARIS after the recent SIEGE, and to defray other Expenditure incurred in connection therewith.

Fifty Thousand Two Hundred Pounds.

II.—SUB-HEADS under which this Vote will be accounted for by the TREASURY.

RELIEF OF PARIS.	£.
A.—AMOUNT REPAYABLE TO NAVAL FUNDS FOR THE ABOVE SERVICE - - -	48,000
B.—PECUNIARY RELIEF - - - - - - - - - - - - - - -	2,200
TOTAL - - - £.	50,200

CIVIL SERVICES.

Treasury Chambers,
16 March 1871.

W. E. Baxter.

EXPLANATIONS.

Class I. 29.—The Excess on this Vote arises from the payment into the Exchequer, in accordance with the Report of the Comptroller and Auditor General, of the Sums received for the value of Stone supplied and Services performed by Portland Harbour for other Departments, and which had been taken in aid of the Vote.

„ 28.—Excess caused by unforeseen repairs required at the Legation House, Madrid, upon a change of Ambassador.

„ 29.—The Expenditure on Consular Buildings in China and Japan during the year was greater than had been anticipated when the Estimate was framed. The Estimate for this Service is necessarily uncertain, as it is impossible to ascertain a year and a half beforehand the amount of charges that will come in course of payment during the financial year. A sum of 22,893 *l.* 10 *s.* 11 *d.* was surrendered to the Exchequer as a surplus on the Grant for 1868-9.

Class II. 24.—Excess caused by appointment of an additional clerk in consequence of illness of the Registrar.

„ 34.—Excess caused by payment in 1869-70 of certain salaries on account of 1868-9. A corresponding surplus was surrendered to the Exchequer on the Grant for 1868-9.

„ 35.—The excess on this grant arises from the Expenditure consequent upon the Irish Fisheries Act, 32 & 33 Vict. c. 92, under which Inspectors were appointed after the preparation of the Estimate.

Class III. 2.—This excess is attributable partly to the salaries of the Clerks of Assize having been, under a new arrangement, paid for five instead of four quarters; partly to their expenses, which are consequent on the duration of the circuits having been longer than was anticipated, and partly to insufficiency of Estimate for repayments of costs of Criminal Prosecutions and for Sheriffs' Expenses.

„ 7.—Excess in consequence of insufficient Estimate.

„ 32.—Ditto - - - - ditto.

„ 35.—This excess is mainly attributable to the payment upon the settlement of accounts with the Colonial Governments of New South Wales and Tasmania, of very large arrears, for the maintenance of Invalids, Lunatics, and Children of Convicts, ranging from 1860 to 1867. This was, however, more than counterbalanced by receipt of arrears from the Colony of Tasmania, amounting to 28,797 *l.*

„ 36.—The charges previously defrayed out of Fees, &c., coming in course of payment during this half-year to 31st March 1870, in consequence of the Courts of Justice Act, 1869, were greater than was anticipated when the Estimate was prepared.

„ 37.—This excess is caused principally by costs of Prosecutions under the Bankruptcy Act of 1861, which were, previously to the transfer of the expenses of the Court to the Votes of Parliament, payable out of Bankruptcy Funds, and which were not foreseen when the first Estimate for the service was prepared.

Class IV. 5.—A larger sum was expended on the purchase of pictures than was provided in the Estimate, unusually favourable opportunities having occurred.

„ 10.—The expenditure connected with National Schools, which is necessarily very variable, exceeded the amount provided, viz., 255,310 *l.* by 2,458 *l.* – *s.* 7 *d.*; the remainder of the excess on this Grant arises from insufficiency of Estimate for "Agricultural Establishments" and "Book and School Apparatus."

„ 12.—A picture was purchased in anticipation of the Vote for the following year, which was diminished by a corresponding amount.

„ 14.—The excess is owing to the increase in numbers and range of studies of the Candidates, and consequently in the Expenses of Examiners.

„ 16.—Excess due to the payment of the salary of the representatives of a deceased Professor for 1868-9 in 1869-70. The amount was surrendered to the Exchequer as a surplus in the preceding year.

Class V. 8.—Insufficiency of Estimate.

„ 9.—Ditto - - ditto

Class VI. 4.—This excess arises from a payment of salary for 1868 to the representatives of a deceased Agent not having been made until 1869-70.

„ 5.—Three Grants for the half-year to 31st December 1868 were paid in 1869-70.

Advances, New Courts of Justice.—This excess arises from an advance having been made to the Architect on account of his Commission, for which no provision had been made in the Estimate.

CIVIL SERVICES.

1869-70.

STATEMENT OF EXCESSES.

A STATEMENT of Sums required to be Voted in order to make good Excesses on certain Grants for Civil Services, for the Year ending 31 March 1870.

(*Presented to Parliament by Her Majesty's Command.*)

Ordered, by The House of Commons, *to be Printed,*
16 *March* 1871.

		TOTAL AMOUNT FOR EACH SERVICE £.	100,000	8,000	†4,500	‡8,000	1,200	§ 7,000	128,700	120,100

* This is for pulling down an old boiler and storehouse, and erecting a new building to provide additional accommodation for draftsmen.

† The Sum for Maps for the Landed Estates Court in the Estimate for 1870-71 was 2,900 *l.*; but the expenditure last year was 4,421 *l.*, and a greater expenditure is this year expected, but whatever the amount it will be repaid from the proceeds of the Sales of the Estates.

‡ This will be more than covered by the Sale of the Maps, the value of the presentations, and of those laid in as stock.

§ This includes 3,000 *l.* for the War Department Services, 2,000 *l.* for the Irish Valuation Maps, and 2,000 *l.* for other Public Departments.

			£.	34,325

	Original Estimate.	Votes and Re-Votes to 31 March 1871.	Expenditure to 31 March 1870.	Estimated Expenditure in 1870-71.	Vote required for 1871-72.	Further Amount required for completing the Work.
C.—TEHRAN MISSION HOUSE:	£.	£.	£.	£.	£.	£.
For the Purchase of Ground, and for the Erection of a new House for Her Majesty's Mission at Tehran	32,000‡	28,000	8,711	11,289	12,000	—

* The Extra Receipts arising from Tonnage Dues, levied for the maintenance of the British Seamen's Hospital at Constantinople, will be found stated in the Estimate for Consular Services, Class V.

† The actual Expenditure in China will probably be less than the original Estimate given in Parliamentary Papers No. 1867 and 381 of 1870. There is an additional sum of 7,000*l.* included in the Estimate for 1871-2 to re-build Consular Offices at Shanghae, burnt down in 1870. Nothing is yet determined on as to further Buildings to be erected in Japan.

‡ £. 12,000 will ultimately be recovered by sale of the old site.

* The Treasury having directed monthly payments to be made instead of quarterly, 14 months' salaries were paid during the year, viz.:—One quarter on 1st April 1869, and 11 subsequent monthly payments.

Sir, Her Majesty's Stationery Office, 20 December 1870.

I HAVE the honour to forward herewith, for the information of the Lords of Her Majesty's Treasury, an Estimate of the sums that will probably be required to defray the expenditure of this office for the public service during the ensuing financial year 1871–72.

The expenditure of the current year will, I expect, not materially, if at all, exceed in the aggregate the sum granted by Parliament; for though some of the sub-heads have required more than the estimated outlay, others have fallen short of that estimate to an equivalent amount. I have been enabled, with the cordial assistance rendered by the heads of various Government Departments to effect some considerable retrenchment in detail; and I see my way to still further economies, of which, however, the operation will not be felt till the ensuing year. The War Office, in particular, has most efficiently aided my exertions in this respect, by judicious arrangements vigilantly enforced.

I am glad to be able to anticipate that I shall not require a larger vote for 1871-72 than that which has sufficed for the current financial year, which, as their Lordships will remember, was nearly 30,000 *l.* less than had been found necessary for 1869-70.

I would wish particularly to direct their Lordships' attention to the satisfactory fact that the net cost of the Stationery Office (as shown in the Annual Balance Sheet appended to this explanatory letter) is decreasing in an even greater ratio than the gross expenditure.

A, B, C, D. Salaries, &c.

I have been enabled to diminish the cost of the establishment, notwithstanding the annual increments of salary to which the various clerks and other employés are entitled, by the reductions effected in our permanent staff. Three clerks and one examiner of paper (in Dublin) have retired, and the activity and zeal of those who remain, aided by some redistribution of work among them, have enabled me to dispense with replacing those who have retired. Under the head of Salaries I shall ask for 1,200 *l.* less than last year; though I shall need 500 *l.* more for incidental expenses in consequence of increased expenditure on account of carriage, which is owing in a considerable degree to their Lordships' orders to discontinue the use of the Post-office for our heavier parcels.

E. Printing for Public Departments.

The ordinary outlay under this head would probably not exceed 83,000 *l.*; but 4,000 *l.* more will be required for the Census Forms (only a very small portion having yet been paid for), and for some extra Scotch printing, half judicial and half statistical. I think 90,000 *l.* had better be provided for this sub-head.

F. G. Paper for Public Departments.

I expect, when the accounts for the year are made up, to find that I shall have spent under this sub-head about 5,000 *l.* less than was allotted to it. This saving arises from three concurrent causes: (1.) The price of paper, though it has risen slightly, has been less than I anticipated. (2.) The miscellaneous consumption in public departments has been reduced by a very appreciable amount. (3.) My stock, laid in in anticipation of an advance in price, was larger than usual at the beginning of the financial year. In parchments, also, I have spent less than usual; and in the two articles together I believe I may venture to meet the probable demands of 1871–72, with 6,000 *l.* less than the Vote for the current year.

H. I. Binding and Small Stores for Public Departments.

Under the head of Binding, I have no extra outlay, either incurred or prospective, to report, and I shall require, as last year, 33,000 *l.* But in stores (miscellaneous articles purchased for Government Departments) I have already effected some savings, and can confidently anticipate still further ones. These have been brought about partly by the substitution of less costly but equally serviceable materials for those hitherto supplied; partly by a reduction in the prices paid consequent upon putting up the supply to renewed competition; and partly by more economical consumption (sometimes caused by reduced establishments) in several public offices.* Under this head, I shall be content with 4,000 *l.* less than last year.

J. Parliamentary Printing.

The outlay for Parliamentary Printing, always a most uncertain item, has this year proved considerably larger than I anticipated, owing to two causes. *First*, The arrangement to which I alluded in my last report, by which Mr. Hansard and other Parliamentary Printers are allowed to draw nine-tenths instead of as formerly two-thirds of their unexamined bills, has only now come into full operation, and will account for nearly 4,500 *l.* of the expected excess. *Secondly*, The work executed by Mr. Thom, of Dublin, has been most unexpectedly heavy—the Primary Education Report and the Evidence relating

* The following is a comparison of the consumption of pens for the past five years, the consumption in this present year being partly estimated:—

YEARS	STEEL PENS.				QUILL PENS.			
	Quantity.	Cost.			Quantity.	Cost.		
		£.	s.	d.		£.	s.	d.
1865-66	Gr. 13,997	1,780	–	–	854,798	1,528	–	–
1866-67	14,433	1,835	–	–	866,267	1,722	–	–
1867-68	14,831	1,886	–	–	795,610	1,737	–	–
1868-69	14,942	1,900	–	–	843,733	1,816	–	–
1869-70	12,335	1,569	–	–	617,845	1,259	–	–
1870-71	10,344	1,315	–	–	430,087	871	–	–

relating to Dublin Freemen especially, are enormously voluminous; and his bill amounts to 3,500 *l.* more than usual. I do not think, if I am to provide at all for unforeseen, but often recurring demands, that I can safely estimate my next year's requirements at less than 80,000 *l.*

L, M, N. Gazettes.

The death of the Editor of the "Edinburgh Gazette" has at last enabled me to provide for a much more economical management of this publication; and by this and by largely reducing the matter needlessly reprinted from the "London Gazette" both in Edinburgh and Dublin, I hope to effect an aggregate saving of 1,200 *l.* a year.

I annex the usual Comparative Tables, from which it will be seen how greatly the net cost of this Department of the Public Service has been reduced; and at how low a rate per cent. the business is transacted. I can confidently anticipate a still further reduction next year in the total net expenditure. But even these figures do not adequately represent the entire truth. Her Majesty's Stationery Office Establishment may almost be said to cost the country *nothing*. The waste paper sold, and the commission charged on work done for repaying offices, the Colonies, and the Government of India, amount to a larger sum than the whole of our salaries and incidental expenses. Thus:—

	£.		£.
Stationery Office Establishment -	19,105	Waste Paper, &c, Sold - - -	15,975
Balance - - - - - -	551	Commission - - - - -	3,681
£.	19,656	£.	19,656

The annexed Tables show the Cost at which the Stationery Office transacts its share of the public business. The result it will be seen is satisfactory:—

	Total Expenditure Controlled.	Gross Cost of Establishment.	Rate per Cent.
	£.	£.	
1865-66 - - - -	448,200	18,600	4·15
1866-67 - - - -	566,985	19,904	3·51
1867-68 - - - -	559,177	20,443	3·65
1868-69 - - - -	560,570	19,784	3·53
1869-70 - - - -	561,553	19,105	3·40

	Parliamentary and Government Expenditure Controlled.	Net Cost of Establishment.	Rate per Cent.
	£.	£.	
1865-66 - - - -	352,300	16,350	4·63
1866-67 - - - -	393,581	16,066	4·08
1867-68 - - - -	392,493	17,482	4·45
1868-69 - - - -	427,703	16,811	3·93
1869-70 - - - -	384,824	15,424	4·00

The Gross and Net Expenditure of the Stationery Office for the last five years, as shown by the balance sheets, was as follows:—

	GROSS.	NET.*
	£.	£.
1865-66 - - - - - - -	352,347	261,927
1866-67 - - - - - - -	393,194	299,919
1867-68 - - - - - - -	392,493	289,475
1868-69 - - - - - - -	427,703	332,631
1869-70 - - - - - - -	384,824	283,817

* The figures in the two first years do not quite agree with those given in my previous letter, owing to the omission of the outlay for Specifications of Patents, printed at the cost of the Stationery Office, but recouped by sales to the public and payments of patentees, an omission which was rectified in 1867-68.

I have, &c.
(signed) *W. R. Greg*, Controller.

The Secretary to the Treasury.

BALANCE SHEET for the Year 1869-70, showing approximately the Net Cost of Her Majesty's Stationery Office.

		Total for ELEMENTARY SCHOOLS, SCOTLAND, CODE 1860	-	-	-	106,000	86,000

* This salary is personal to the present Secretary.

† Will be reduced to 10 and 20, as vacancies occur.

1.—Public Education, Great Britain —*continued.*

A.—Reorganization of establishment, sanctioned by Treasury Letters of the 11th August 1870, No. 15,110, and 13th March 1871, No. 479.

B.—This Estimate provides for the employment of writers, to meet the special demands on the department, in connection with (1) the Christmas Examinations, (2) the Educational Survey of England, and (3) the great increase in the number of applications for Building Grants.

D.—The addition to the numbers borne on this Estimate is to meet the anticipated increase in the work of inspection, in consequence of the number of new schools which will be brought under inspection by the School Boards appointed under the Elementary Education Act, 1870, and also through the operation of that Act upon existing voluntary schools. The applications from voluntary schools in England and Wales in 1870, to be placed under inspection, exceeded the applications in 1869 by 105 per cent. Approved by Treasury Letters of the 24th February 1871, No. 2795, and 15th March 1871, No. 3462.

F.—Pursuant to successive Minutes, of which the first was dated 11th June 1864, the inspection and examination of elementary schools in Scotland have been regulated by the Revised Code, but grants have continued to be paid according to the Code of 1860, to allow time for measures to be taken upon the Report of Her Majesty's Commissioners appointed to inquire into the Schools in Scotland.

The Estimate for 1870–71 has proved to be considerably below the sum required for the expenses of the year. It is estimated that the expenditure for 1870–71, will be upwards of 94,000 *l.*, and the difference between this sum and the amount at which the Estimate for 1871–2 has been fixed, is principally accounted for by the large increase in the number of certificated masters and mistresses and pupil teachers employed in schools in Scotland, on the 31st December 1870, as compared with the number employed in the preceding year, viz. :—

	1869.	1870.
Certificated Masters and Mistresses - -	2,406	2,486
Pupil Teachers - - - - - -	2,859	3,227

1.—Public Education, Great Britain—*continued.*

I.—The *numbers*, 1,500,113 Day Scholars and 91,924 Evening Scholars, are arrived at as follows :—

	Day Schools.	Evening Schools.
Average number of Scholars in attendance in Schools actually inspected in the year ending 31st August 1870. This number is the basis of calculating the other figures in these columns - -	1,152,389	73,645
Add for increase for one year, viz.: 20·11 per cent. for Day Schools, and 16·7 per cent. for Evening Schools - - - - - -	231,745	12,299
Estimated average number in attendance at Schools to be inspected in the year ending 31st August 1871 - - - - - - -	1,384,134	85,944
Add *five*-twelfths* of the same rates of increase on 1,384,134 and 85,944 for the *seven** months to follow from 31st August 1871 up to 31st March 1872:		
Five-twelfths of 20·11 per cent. on 1,384,134 Day Scholars -	115,979	—
Five-twelfths of 16·7 per cent. on 85,944 Evening Scholars -	- - -	5,980
Total - - -	1,500,113	91,924

The *rate* of grant actually paid per *day* scholar, for years ending 31st August, rose under the Revised Code from 8*s.* 1*d.* in 1863, and 9*s.* in 1864-5-6-7, 9*s.* 4¾*d.* in 1868, and 9*s.* 7*d.* in 1869, to 9*s.* 9¼*d.* in 1870. Under the New Code it is estimated that during the year ending 31st March 1872 the rate of grant will rise to 12*s.* 6*d.*

The rate of grant per evening scholar for the years ending 31st August was 5*s.* 9½*d.* in 1865, 5*s.* 8*d.* in 1866, 6*s.* 3*d.* in 1867, and 6*s.* 4¾*d.* in 1868, 6*s.* 6½*d.* in 1869, and 6*s.* 9*d.* in 1870. The rate of 7*s.* -½*d.* has been adopted for the year ending 31st March 1872, inasmuch as the alterations introduced into the Code for 1871, will not affect the grant for the year 1871-2.

K.—Section 96 of the Elementary Education Act 1870, provides, *inter alia*, that "no Parliamentary Grant shall be made in aid of building, enlarging, improving, or fitting up any elementary school, except in pursuance of a memorial duly signed, and containing the information required by the Education Department for enabling them to decide on the application, and sent to the Education Department on or before the Thirty-first day of December, One thousand eight hundred and seventy."

The effect of this section has been to cause an unprecedentedly large number of applications for building grants to be made during the past year.

Under the terms of Article 37 of the Code of 1870, "Grants" (for Building) "under 50 *l.* are treated as lapsed if unpaid at the end of nine months, and grants above 50 *l.* at the end of eighteen months, from the date of announcing them;" and, as no grant is paid until the whole of the conditions have been complied with, it is estimated that the bulk of the liabilities under this head of the vote will not be discharged during the financial year 1871-2.

L.—In calculating the estimate for Grants to Training Colleges, it is assumed that 100 *l.* represents the cost of training a male, and 70 *l.* that of training a female student, during two years. The College is credited annually with 100 *l.* for each of its male, and 70 *l.* for each of its female students, who, after probationary service as a teacher, obtains a certificate; at the same time the total amount of the grant is limited to 75 per cent. of the approved expenditure, and also depends upon the number of students for the time being in residence.

The number of students in residence, in respect of whom grants are made, is largely increased in the current over the past year.

M.—This Estimate provides for expenses to be incurred in carrying into effect the provisions of the Education Act which relate to the organization of school districts; and also for various items of expenditure under that Act, which are inapplicable to the foregoing heads of service.

I.—PUBLIC EDUCATION, GREAT BRITAIN—*continued.*

This and the remaining pages do not contain Estimates, but Accounts of the past year, given by way of explanation.

* The expenditure made from the Parliamentary Grant for Public Education, on account of the Isle of Man, is repaid annually out of the Insular Revenues, not to the Committee of Council, but through the Treasury to the Exchequer.

1.—PUBLIC EDUCATION, GREAT BRITAIN—*continued.*

The following Tables, published in anticipation of the Annual Report, are confined to Schools aided with Annual Grants in the Year ending 31st August 1870. Within that period other Schools (Institutions, attended by 46,004 Scholars on the day of inspection, were also visited, but the Returns made by the Managers were generally too imperfect to afford a basis for statistical calculations. Where no Grant is depending on the Returns, the completion of them cannot be enforced.

* The Census gives the population only in quinquennial divisions.

† The Age Returns of Scholars do not distinguish ages under four years, nor over 14 years. In the comparison of scholars with population, allowance must be made for a few scholars aged less than three years, and more than 14 years; but the number is insignificant.

‡ The examination of children under six years of age is not recorded.

§ The standards are placed under the years (*see* heads of columns in which each is meant to be passed. The marginal subdivisions (under 10 years, over 10 years) of C, D, and E, show how many children, at the end of the ordinary day-school age, are presented, and fail to pass in each standard.

1.—PUBLIC EDUCATION, GREAT BRITAIN—*continued.*

NOTE.—Per-centage of Scholars on Registers aged † between	6 and 7.	7 and 8.	8 and 9.	9 and 10.	10 and 11.	11 and 12.	6 and 12
ENGLAND and WALES	11·41	11·73	11·74	11·17	9·89	7·09	63·03
SCOTLAND	11·95	13·78	12·54	12·38	11·1	8·84	70·59
GREAT BRITAIN	11·48	12·	11·83	11·34	10·06	7·85	64·56

* The better allowance is 10 feet of internal area per Scholar. On this measurement the number of Scholars must be reduced by one-fifth part, and the per-centages on the same line correspondingly increased; but eight feet is the common allowance in such calculations, and, therefore, for the sake of comparison, it is retained in the Table.

† Comparing these figures with those above them, it will be seen how the per-centage of Scholars presented for examination *exceeds* the per-centage of age at which each standard is meant to be passed in the *lower* standards, and *falls short* in the *higher* standards.

1.—PUBLIC EDUCATION, GREAT BRITAIN—*continued.*

* Held in separate buildings, and separately managed. † In which separate teachers are employed. ‡ At the rate of 8 square feet of superficial area per child.

§ The figures in this group of columns are confined to those cases in which the *superficial area* of school-rooms has been increased. The total number of schools enlarged or improved includes a considerable proportion of cases in which fixtures, or the like, have been provided *without any extension of area*.

A period of eighteen months from the date of each award is allowed for claiming the payment of Building Grants. Grants for improvement or enlargement may be claimed within nine months from the date of award. Beyond these periods the Committee of Council does not hold itself responsible for payments. From this arrangement it results that a great portion of the Grants for building, enlargement, or improvements paid in each year was awarded in previous years. The grants awarded in the year 1870 amounted to £. 38,457 4 *s.* 3 *d.*; of which amount only £. 7,353 15 *s.* 9 *d.* was paid within the year; the grants *paid* within the year (whether awarded within it or not) amounted to £. 27,506 18 *s.* 7 *d.*; the grants remaining unpaid, and of which payment may be claimed before 31st December 1871, in addition to those to be awarded within the same period, amount to £.35,494 14 *s.* 9 *d.* The Estimate for Building is framed with reference to all these figures.

TABLE, No. 7.

TEACHERS.

The Number (brought up to 31st December 1869-70) of Teachers actually serving in aided Schools is—

	1869.			1870.			Increase.	Decrease.
	England.	Scotland.	TOTAL.	England.	Scotland.	TOTAL.		
Certificated Teachers	12,027	2,406	14,433	12,744	2,486	15,230	797	–
Assistant Teachers	1,236	9	1,245	1,213	– – –	1,213	– – –	32
Pupil Teachers	12,842	2,859	15,701	14,710	3,227	17,937	2,236	–
TOTAL	26,105	5,274	31,379	28,667	5,713	34,380	3,033	32

The total number of students resident in Training Colleges in 1870 was 2,600; this number is equal to the supply of 1,300 fully-trained teachers per annum, or something less if the few who reside for one year only be excluded.

— 2. —

SCIENCE AND ART DEPARTMENT FOR THE UNITED KINGDOM.

* The increase in this Vote is partly for more Inspectors on account of the increased number of Schools, and partly for instruction to Science Teachers, who, by competition, come to London to attend lectures in Biology and Experimental Physics.

† (B. 3.—5.) 10 gold, 22 silver, and 58 bronze medals, together with 86 prizes of books and 11,393 cases of drawing instruments, books, &c. have been awarded during the year 1870.

‡ The increasing demand for examples illustrating Special Art and Industry in Birmingham and other towns, has made the increase necessary

The number of Papers in Science worked by Students, and examined, in 1870, was 34,413; in 1869, 24,085.

(B. 10.) The following are Professional Examiners in Art, viz.:—

Sir F. Grant, P.R.A; Sir M. Digby Wyatt; J. C. Horsley, R.A.; R. Westmacott, R.A.; C. W. Cope, R.A.; R. Redgrave, R.A.; F. R. Pickersgill, R.A.; F. Leighton, R.A.; E J. Poynter, A.R.A.; J. Fergusson, F.R.S.; J. Marshall, F.R.S.; with Assistants.

The number of Papers in Art worked by Students under examination, and examined, in 1870, was 139,064, and 90,689 drawings were submitted in competition for prizes; in 1869, 127,800 Students and 65,400 drawings.

(C. 1.) The General Stores Division is the channel through which all Prizes for Science and Art Schools, Drawings for Examination, and objects for circulation or for the Museum are received, examined, and distributed.

The Select Committee on Schools of Art, 1864, recommended "that the Collection of Works of Decorative Art at South Kensington be made more generally useful than at present throughout the country, especially in connection with local museums." Objects, therefore, are circulated, and the number of applications increases largely every year.

CIRCULATION of Objects to Exhibitions in Aid of Schools of Art for the Purpose of Study.

Since 1854, contributions have been made to 169 Exhibitions, 131 of which have returned total number of Visitors amounting to 3,506,051 persons. Whilst to seven of these Exhibitions the admission was free, 75 localities returned amount of fees received for admission at 33,202 *l.* 15 *s.* 3 *d.*; 35 of the Exhibitions declared a surplus, after payment of all expenses, amounting to a total of 18,300 *l.* Besides the Exhibitions included in the above return, large contributions were sent to Manchester, 1857, Dublin, 1865, Leeds, 1868; contributions have been also sent annually to the Fine Art Collection of the Bath and West of England Society. The Return of Visitors to these Exhibitions is given by the Committees as 3,206,757. The Museum, as a general storehouse for objects which can be sent to Schools of Science and Art, has, under the term Circulation, three distinct classes of objects, &c., which are distributed under the following heads:—

1. Examples, paintings, water-colour drawings, books, &c., from the Art Library, furnished on application to schools for stated periods for the purpose of study.

2. Original Art objects, paintings, water-colour drawings, electrotype reproductions of objects from foreign museums and private collections, which, according to the first list, comprises a total number of 3,685 specimens.

3. Circulation or distribution of works specially prepared from the original Art objects reproduced by means of chromolithography, photography, etching and electrotyping; these are sent on deposit loan, to be retained by the schools for a period of one or more years.

This List comprises the following publications, for distribution to Schools of Art:—

Universal Catalogue of Books on Art, 2 vols. 4to.

Universal Inventory of Objects of Art, Mosaics, 1 vol. 8vo.

Two Parts—Each part contains chromolithographs of four of the principal objects of Art in the South Kensington Museum.

Three volumes, each of 50 etchings, of objects of Art in the Museum.

Books of Photographs of Italian Jewellery; of Batalha, in Portugal; of Ecclesiastical Metal Work; of Henri Deux Ware; of the Cathedral of Santiago, in Spain; of Terra Cotta columns designed by the late Godfrey Sykes; of the Treasures of Petrossa; of Decorative Plate; of Musical Instruments; of Holbein's Designs; of Arcades in Rome; of Roman Fountains.

Illustrations of Indian Architecture.
Drawings of Life Studies by the late W. Mulready, R.A.
French Crayon Drawings of Life Studies.
French Mechanical Studies.

(C. 3.—1 & 2.) These purchases are supplementary, a large number of the books and objects in the collections being presented to the nation by the public. The collections of Naval Architecture have been lately transferred from Somerset House for the use of the Students of the School of Naval Architecture, and the inspection of the public. Numerous additions have been made by private shipbuilders.

The Educational Library was attended in 1870 by 13,496 persons; in 1869 by 11,097.

The Museum has been enriched by a bequest of valuable books, drawings, paintings, and engravings by the Rev. Alexander Dyce. The valuable collection of arms and armour known as the "Meyrick Collection" has been lent to the Museum, and is now exhibited in the Galleries overlooking the Horticultural Gardens. The Competition Drawings for the Law Courts have been presented by the First Commissioner of Works.

GIFTS and BEQUESTS to the South Kensington Museum.

The principal Gifts and Bequests to the Museum :—

In 1857. By John Sheepshanks, Esq., 233 oil paintings, 196 water colour paintings, etchings and other drawings. (Gift.) (Mr. Sheepshanks died in 1863.)

In 1860. By Mrs. Elizabeth Ellison, 51 water colour drawings. (Acting in the spirit of the intention of her late husband Richard Ellison, Esq., of Sudbrooke House, Lincolnshire.) For the purpose of forming a national collection of water colour drawings. (Gift.)

In 1864. By Rev. R. Brooke, 396 objects, consisting of textiles, watches, rings, &c., and 718 volumes of books. (Gift.)

In 1867. Mrs. Wollaston 211 drawings of mosaics, made for and collected by the late Dr. Robert Wollaston. (Gift.)

In 1867. By W. Minshull Bigg, Esq., the three following works in marble, by Lough; "Puck," "Titania," "The Melancholy Jaques." (Bequest.)

In 1867 and 1868. By Sir C. Wentworth Dilke, Bart., M.P., 297 volumes, 862 pamphlets, and 155 prints, illustrating the Great Exhibition, 1851. (Gift.) (Sir Wentworth died in 1869.)

In 1868. By Mrs. Louisa Plumley, 43 enamel paintings by Essex, Bone, and other artists. (Bequest.)

In 1868. By John Ella, Esq., 329 volumes of music, printed, and in MS.; 6 busts, 1 oil painting (a portrait of Rossini). From the Library of the Musical Union Institute. (Gift.)

In 1868. By Rev. Chauncy Hare Townshend, 211 objects, chiefly jewels, 145 oil paintings, 175 water colour paintings, 4,218 Swiss coins, 831 volumes, 390 drawings, 1,815 prints. (Bequest.)

In 1869. By Rev. Alexander Dyce, 80 pictures, 62 miniatures, 83 drawings, 1,511 prints, 74 rings, 27 art objects, 13,596 books. (Bequest.)

In 1870. By Mr. William Gibbs, a collection of Roman, Celtic, and Anglo-Saxon relics, consisting of ancient glass beads, jewellery, terra cotta, horse trappings, weapons; also a series of drawings of antiquities. (Bequest.)

By Mr. John Meeson Parsons, a collection of 92 oil and 47 water-colour paintings. (Bequest.)

(C. 8.—9.) The Art Library was attended by 18,334 persons in 1870; by 18,758 persons in 1869. Books are also circulated to local Schools of Art under proper regulations.

NOTES.

* In addition to 1,200 *l.* as Secretary to the Science and Art Department.

† Personal to the present keeper.

The number of Visitors to the Museum during the year 1870 has been, in the morning, 742,880, and in the evening, 271,969; giving a total of 1,014,849 persons. Since the opening of the Museum, from 22 June 1857 to 31 December 1870, it has been visited by 10,071,667 persons. The annual average, excluding 1862, the year of the Exhibition, has been 778,364.

‡ The Metropolitan Police Force has the entire charge of watching the Museum, both internally and externally. (D. 6.) The Museum and Schools are lighted from sunset till 10 p.m., and great precautions against fire are necessary. There is a detachment of Royal Engineers on the premises to act if wanted. The numbers attending the Museum in the evening, since the opening in 1857, have been 3,483,366.

§ The increase in this Estimate is to provide for the opening of new courts.

III. DETAILS of the foregoing.

	1871-72.	1870-71.
A.—WEST INDIAN ENCUMBERED ESTATES COMMISSION:	£.	£.
Chief Commissioner	700	800
Assistant Commissioner, and Secretary	400	400
First Clerk	150	150
Second Clerk and Messenger	100	100
Incidental Expenses	35	35
TOTAL for WEST INDIAN ENCUMBERED ESTATES COMMISSION - - £.	1,385	1,485

EXTRACT from REPORT of Assistant Commissioner of the West Indian Encumbered Estates Commission, dated 29 December 1870.

By the Act 33 & 34 Vict. c. 103, the Commission is now continued to the 31st of March 1872.

Having regard to the business connected with the distribution of the purchase moneys of estates already sold, and with the sale of other estates the sale of which has been ordered, it is not possible that the business of the Commission can be completed within the year 1871.

The fees received in the year ending 31st December 1869 amounted to 560*l.*

The fees received during the year 1870, up to the present date, amount to 817*l.* 14*s.* 8*d.*

	1871-72.	1870-71.
B.—RIVERS POLLUTION INQUIRY COMMISSION:	£.	£.
Chief Commissioner	—	1,000
Two Commissioners, at 800*l.* each	1,600	1,600
Secretary	500	400

Incidental Expenses	235	235
Shorthand Writing	400	500
Laboratory	700	700
TOTAL for RIVERS POLLUTION INQUIRY COMMISSION - - £.	4,100	5,300

EXTRACT from LETTER of Secretary, dated 10 January 1871.

The Commissioners have presented—First Report (The Mersey and Ribble Basin, polluted by the Cotton Manufacture); and, Second Report (The A.B.C. Process of Treating Sewage).

The Commissioners have also inspected the Wear, Tees, Aire, Calder, Wharfe, Lower Avon (Gloucestershire), Frome, Windrush, Stour, upper part of the Severn, Tweed, and Irvine, being river basins most extensively polluted by the woollen manufacture. Samples of the polluting liquids flowing into these streams, as well as of river water, have been collected by the Commissioners, and analysed in the laboratory of the Commission.

A mass of written and oral evidence from town authorities, manufacturers, traders, and riparian proprietors in these districts has been collected, is now in press, and the Commissioners are completing their Third Report (Pollution arising from the Woollen Manufacture, and processes connected therewith); this Report will be presented early in February.

The Commission has been extended to Scotland, and the Commissioners have been directed to inquire into "the specific pollution caused by any particular manufacture, wherever located in England or Scotland." In obedience to these instructions the Commissioners have inspected the basins of the Dee, Esk, Tay, Leven, Forth, Tweed, Clyde, Irvine; visited the chief cities and burghs in these watersheds; conferred with the authorities; held public courts, and examined witnesses; they have also inspected the chief manufactories, mills, and works; collected samples of the liquid refuse from each, and of the water supply to the towns; these several samples have been analysed in our laboratory.

The Commissioners in addition have obtained from municipal bodies, and from manufacturers in Scotland, in reply to queries sent, considerable evidence which is now in the hands of the printer, and the Commissioners are also preparing their Fourth Report (On the pollution of River Basins in Scotland generally); this Report will be presented early in the ensuing Session.

The Commissioners will then direct their attention to that part of the inquiry relating to pollution of mining, iron manufacture, metallurgy, paper manufacture, starch manufacture, and breweries, and the subject of the water supply.

The Commissioners hope to complete their work next year.

1.—TEMPORARY COMMISSIONS—*continued.*

	1871-72.	1870-71.
C.—JUDICATURE COMMISSION:	£.	£.
Secretary	400	400
Clerk	104	104
Messenger	65	65
Expenses of Witnesses	—	200
Shorthand Writing	—	100
Incidental Expenses (Refreshments, Postages, Cab-hire, &c.)	300	200
Travelling Expenses	100	250
TOTAL for JUDICATURE COMMISSION £.	969	1,319

This Commission was appointed to inquire into the constitution of the Courts of Law and Equity, and a Report has been presented, dealing with the following subjects, viz., Establishment of a Supreme Court, Sittings and Assizes, Juries, Appeals, and a scheme for a Court of Appeal. The Secretary states, in letter of the 14th December 1870, that he has no means of estimating the probable time it will take to complete the inquiry.

	1871-72.	1870-71.
D.—PUBLIC ACCOUNTS COMMISSION:	£.	£.
Special Commissioner	1,000	1,000
Travelling and Incidental Expenses, &c.	300	300
TOTAL for PUBLIC ACCOUNTS COMMISSION £.	1,300	1,300

There are two Commissioners, one of whom is unpaid. This Commission has been specially appointed to carry out the provisions of the Act 29 & 30 Vict. c. 39.

	1871-72.	1870-71.
E.—PUBLIC SCHOOLS COMMISSION:	£.	£.
Secretary	400	400
Clerk	104	104
Messenger	65	65
Travelling Expenses	30	—
Incidental Expenses	70	100
TOTAL for PUBLIC SCHOOLS COMMISSION £.	669	669

EXTRACT from LETTER of Secretary of the Commission, dated 13 December 1870.

With regard to the progress of the Commission, I have to state that the new governing bodies of Eton and Westminster Schools, who were appointed towards the end of the year 1869, have been in active work during the past year, and have very considerably progressed in making reconstructive statutes, schemes, and regulations, subject to the approval of the Commissioners. Nevertheless it is not expected, on the part of the new governing body of Eton, that their work in the above respects will be finally completed much before 31st July 1871. With respect to the remainder of the Public Schools, viz., Winchester, Harrow, Rugby, Charterhouse, and Shrewsbury, the statutes for determining and establishing the constitution of their new governing bodies respectively have been made by the Commissioners, and laid before Her Majesty in Council for approval. Petitions have been presented against certain of these statutes, which are now pending before the Privy Council.

It is impossible to estimate with accuracy how far the full period of time permissible under statute will be required by the Commissioners. By the "Public Schools Amendment Act, 1870," the powers of the Commissioners were suspended, and extended, subject to Order in Council, to 31st December 1872. The time required for the work of the Commission will depend much upon the co-operation of the new governing bodies who, in five cases, are not yet appointed, and may be yet more directly affected by the statutory delays that would be caused if Her Majesty were to withhold Her approval in the case of any statute, when, in every such case, the formalities and procedure prescribed in relation to the making of an original statute will have to be reiterated. At the same time, experience gained in dealing with the foundations and schools of Eton and Westminster should enable the Commissioners to deal more readily and more rapidly with the cases of the remaining schools.

Inasmuch as, by the said "Public Schools Amendment Act, 1870," all statutory powers of making statutes, schemes, and regulations have been continued to the new governing bodies in all cases until 31st July 1871, when they are to pass to the Commissioners, it will be obvious that the work of the Commission cannot reasonably be completed until after 31st December 1871.

1.—TEMPORARY COMMISSIONS—*continued.*

	1871-72.	1870-71.
F.—SANITARY COMMISSION:	£.	£.
Secretary	50	400
Clerk	12	104
Messenger	8	65
Shorthand Writing	—	400
Expenses of Witnesses	—	150
Travelling and Expenses of Commissioners	—	150
Incidental Expenses	5	31
TOTAL for SANITARY COMMISSION £.	75	1,300

EXTRACT from LETTER of Secretary, dated 24 December 1870.

The Commissioners fully expect to sign their Report before the opening of Parliament.

There will still remain the preparation for publication of the evidence which they have received in answer to the Circular questions issued by them, and copies of which appear in the Appendix to their first Report.

The accompanying Estimate is for six weeks' expenses.

	1871-72.	1870-71.
G.—HISTORICAL MANUSCRIPTS COMMISSION:	£.	£.
Remuneration, at 2 *l.* 2 *s.* per diem, to Inspectors employed in visiting Collections of MSS., their Travelling Expenses, and Incidental Expenses of the Commission	1,200	1,000
Arranging papers recently discovered in the House of Lords	500*	—
TOTAL for HISTORICAL MANUSCRIPTS COMMISSION £.	1,700	1,000

EXTRACT from Secretary's LETTER of 28 January 1871.

It will be impossible, judging from this year's expenses, to do with less than 1,200 *l.*

A report of the proceedings of the Commission is in preparation, and will be ready for presentation to Parliament about the same time as last year, the first week in March.

	1871-72.
H.—AID TO SCIENCE COMMISSION:	£.
Secretary	300
Messenger	52
Travelling Expenses	120
Incidental Expenses	60
TOTAL for AID TO SCIENCE COMMISSION £.	532

EXTRACT from LETTER of Secretary, dated 21 January 1871.

Since the appointment of the Commission, on the 18th May 1870, the Commissioners have had 24 meetings, and have examined 39 witnesses, principally with reference to the examinations in science, conducted by the Science and Art Department, and to the science teaching in the Universities of Oxford and Cambridge.

The Commissioners have also obtained a large number of returns from the Universities of Great Britain and Ireland, and from various public schools, bearing on the inquiry entrusted to them.

The Commissioners are of opinion that it will require at least a year from the present time to complete the inquiry.

	1871-72.
I.—FRIENDLY SOCIETIES COMMISSION:	£.
Secretary	400
Clerk	208
Messenger	55
Witnesses	250
Travelling and Subsistence Expenses of Commissioners	300
Incidental Expenses	240
TOTAL for FRIENDLY SOCIETIES COMMISSION £.	1,453

* This amount is to provide for payment, at fixed rates, of Officers of the House of Lords engaged under the Commission on this service, and for other expenses connected therewith.

1.—Temporary Commissions—*continued.*

Extract from Letter of Secretary, dated 28 December 1870.

This commission has held several meetings; many valuable communications and offers of evidence have been received from all parts of the country; considerable progress has been made in one branch of the Commissioners' inquiries, viz., as to the office and duties of the Registrar, and some progress in that as to the organisation and condition of Friendly Societies, and sets of questions for circulation throughout the country are under consideration. In my opinion the operations of the Commission cannot last less than two years, and may last longer if the investigation be carried out in an exhaustive manner, and actuarial calculations are undertaken.

	1871–72.
K.—CONTAGIOUS DISEASES ACT COMMISSION:	£.
Secretary	400
Clerk	104
Messenger	55
Shorthand Writing	300
Expenses of Witnesses	100
Travelling, &c. of Commissioners	200
Incidental Expenses	100
Total for Contagious Diseases Act Commission £.	1,259

Extract from Letter of Secretary, dated 20 December 1870.

I am to acquaint you that the Commissioners have held three sittings, that the inquiry will be a prolonged one, but they are not yet in a position to form any reliable estimate as to its probable duration.

* The Out-door Officers and Boatmen receive 1 *s.* day pay when employed on Sundays.

† Previous to the passing of the Customs Amendment Act, 1857, the Crown provided Warehouses for the deposit of Tobacco under Bond. The Crown is liable to the payment of Rent for the Warehouse which was provided at Liverpool, until the expiration of the Lease thereof; but the Premises have been sub-let from the 25th March 1865, at a rent equal to that paid by the Crown, 6,760 *l.*; and this amount will be brought to account as Customs Revenue.

* As vacancies occur two Boy Messengers will be appointed to Secretary's Office, and the two Redundant Messengers employed in the Accountant's Office will be absorbed into the Messengers on the New Scale for Adults in that Office, which will ultimately comprise five persons.

† The sums paid to these officers are more by 25 *l.* each than the sums required to be voted in this Sub-Head, so much of their salaries being chargeable on the Post Office Savings Bank, and provided for in Sub-Head (E.)

‡ The salary of one of these Clerks is chargeable on the Post Office Savings Bank, and is provided for in Sub-Head (E.)

§ The 1st Class should comprise six officers, but that number will not be borne on it until the Deputy Controller, Old Establishment, has been absorbed.

‖ The 1st Class of Sorters will eventually comprise 22, additions being made thereto as vacancies occur amongst the 14 Clerks on the Old Establishment.

* The Tables for the Insurance of Lives, and that portion of the Tables for the grant of Annuities, which have been framed under the authority of the Act 27 & 28 Vict. c. 43, have been constructed in accordance with the 6th section of that Act, which section declares it to be expedient that the Fund to be formed by the receipt of Sums on Account of Contracts effected under the Act, shall be adequate to meet all claims accruing, and to accrue, thereon, so as to render certain the fulfilment of all engagements under such Contracts without entailing any charge in respect thereof, or in respect of Costs and Expenses, on the Consolidated Fund of the United Kingdom.

To the premiums fixed for the purchase of Annuities payable half yearly, by single or annual payments, no addition has been made for Costs and Charges; but to provide for such Costs and Charges the purchasers of such Annuities are required to pay, at the time of purchase, Fees not exceeding those sanctioned in respect of such Annuities by the Acts 7 & 8 Vict. c. 83, s. 9, and 16 & 17 Vict. c. 45, s. 11.

The amount expended under this Vote will be repaid to the Exchequer with other Extra Receipts.

* Including about 300,000 oz. charged with Book Postage.
† „ „ 640,000 „ „ „
‡ „ „ 1,550,000 „ „ „

Note—The Estimate of Official Postage up to the 31st March 1868 was framed on the principle of charging Inward Letters at the unpaid rate. The present Estimate is framed on the principle of charging Inland and Colonial Letters, inwards and outwards, at the pre-paid rate. Had it been framed on the old principle, the total amount would have been about 265,906 *l.*, instead of 209,156 *l.*
